

Exam4Test 000-239 Exams

IBM eserver p5 sales

Practice Exam: 000-239

Exam Number/Code: 000-239

Exam Name: eserver p5 sales

Questions and Answers: 138 Q&As

Exam Description

Order : [000-239 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-239 Exam.

Exam4Test **Practice Exams** for 000-239 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **Certified Specialist** exam and get your *Certified Specialist Certification*.

We guarantee your success in the first attempt. If you do not pass the **Certified Specialist** "000-239" (eserver p5 sales on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test Certified Specialist 000-239 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of Certified Specialist 000-239 exam provides everything which you need to pass your exam. The Certified Specialist Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-239 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first eserver p5 sales(Certified Specialist) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-239 exam.

000-239 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real Certified Specialist exam. 000-239 exam questions updated on regular basis.

Like actual Certified Specialist Certification exams, 000-239 exam preparation is in multiple-choice questions (MCQs). Tested by many real Certified Specialist exams before publishing.

Try free Certified Specialist exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 000-239 Exam: 100% Guarantee to Pass Your 000-239 exam and get your Certified Specialist Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your Certified Specialist Certification.

Exam4Test professional provides Certified Specialist 000-239 the newest Q&A, completely covers 000-239 test original topic. With our completed Certified Specialist resources, you will minimize your Certified Specialist cost and

be ready to pass your 000-239 test on Your First Try, 100% Money Back Guarantee included!

000-239 Exam Study Guide

000-239 exam is regarded as one of the most favourite [Certified Specialist Certifications](#). Many IT professionals prefer to add 000-239 exam among their credentials. Exam4Test not only caters you all the information regarding the 000-239 exam but also provides you the excellent 000-239 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 000-239 exam

000-239 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-239 exam questions updated on regular basis

Same type as the certification exams, 000-239 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-239 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-239

Title : Eserver P5 Sales

1. A bicycle manufacturing company has several legacy applications on separate servers running their back office and production management. They are interested in consolidating their application environment to decrease complexities and improve operational costs. Which solution would be the best option to meet the customer's needs?

- A. Business Intelligence solution
- B. Enterprise Resource Planning solution
- C. Customer Relationship Management solution
- D. Workload Manager coupled with Migration Factory services

Answer: B

2. What function of Advanced Power Virtualization allows communication between partitions?

- A. VLAN
- B. AIX 5L V5.3
- C. Additional Ethernet cards installed in different partitions
- D. Virtual Storage Server

Answer: D

3. Which of the following technologies is designed to reduce outages and facilitate problem determination by identifying failing components in real-time?

- A. Redundant Bit Steering
- B. Light Path Diagnostic
- C. First Failure Data Capture
- D. Dynamic Processor Deallocation

Answer: C

4. A Web retailer wants to move a backend database application from their current HP server to an eServer p5 server. Which of the following industry standard benchmarks should be used to determine the appropriate eServer p5 model for their environment?

- A. rPerf
- B. TPC-C
- C. Linpack
- D. SPECweb99

Answer: B

5. What is the minimum number of 8-port adapters needed in the HMC to manage three partitioned p5 systems?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

6. A customer would like to migrate and consolidate applications from old Sun servers to new eServer p5 servers. The applications are growing and expected to double in needed capacity next year. The customer would like to purchase the solution now because their budget will be greatly reduced next year. However, they do not have enough budget to cover the solution for next year's capacity. What should an eServer p5 Sales Specialist recommend?

- A. A system to address the complete capacity requirements but smooth payments via an IGF lease
- B. CPU and memory CUoD options so the customer can use the budget now with only activation costs next year
- C. Smaller eServer p5 servers with SMT, increasing utilization while mitigating future capacity concerns
- D. That the customer purchase as many eServer p5 servers as their current budget will allow, thereby reducing stress on next year's budget

Answer: B

7. A manufacturing firm has a number of very small UNIX and Linux servers. Which of the following IBM offerings would allow the firm to consolidate the systems on a single server and achieve maximum utilization?

- A. Container
- B. Virtualization
- C. vPAR
- D. nPAR

Answer: B

8. A distribution company has rapidly changing demands on their infrastructure. What features of the Virtualization Engine will help their infrastructure be as flexible as their business demands?

- A. DLPAR, .NET compatibility, VLAN
- B. Micro-Partitioning, Containers, Virtual storage
- C. Simultaneous multi-threading, Micro-partitioning, VLAN
- D. Micro-partitioning, VLAN, Virtual storage

Answer: D

9. A manufacturing company has 12 large workloads and four small workloads and would like to run them on a p5-570 with eight dedicated LPARs and the other four workloads in a shared pool. Which of the following is most important to articulate to the customer?

- A. eServer p5 LPARs with AIX 5L V5.2 can share multiple I/O adapters.
- B. eServer p5 logical partitioning requires a dedicated Hardware Management Console.
- C. eServer p5 LPARs have the granularity to balance each of the 16 workloads.
- D. All LPARs can share one network connection with Dynamic LPAR capability in AIX 5L v5.2.

Answer: C

10. A vending machine company will be running an Oracle database. This customer is on a path of expansion via

acquisition. Which system would offer them the most cost-efficient environment with highest flexibility for future growth?

- A. p5-550 4-way running Oracle in SMP mode
- B. p5-570 8-way running Oracle in a 4-way LPAR with 4 inactive CUoD processors
- C. Eight p5-520 2-way running Oracle in cluster using CSM
- D. Two clustered p5-550 2-way's running Oracle 9i RAC

Answer: B

11. An environmental organization is implementing DB2 and requires 16GB memory, 2TB of storage, and 8 CPUs. They would also like to run three other single-CPU applications on the same server. Which of the following solutions would be the most cost effective and allow for future growth?

- A. p5-550 running 4 logical partitions
- B. p650 running 4 logical partitions
- C. p5-520 with Micropartitioning
- D. p5-570 running 4 logical partitions

Answer: D

12. A customer needs to be in production 24 hours a day, seven days a week. The greatest concerns are the reliability and availability of the system. Which of the following is the most appropriate topic to discuss?

- A. Workload Manager software which allows load balancing over multiple partitions
- B. SMT which allows for higher reliability through better processor utilization
- C. Hypervisor which provides dynamic partitioning failover allowing improved up-time
- D. Dynamic firmware updates which allow for patches to be applied while the system remains in production

Answer: D

13. Application requirements are major decision criteria in determining if AIX or Linux should be the operating system on eServer p5 servers. If a customer has a key requirement on a specific application, which of the following points need to be understood in operating system selection?

- A. Open Source code only runs on Linux, an Open Source operating system.
- B. If the application is written in JAVA, the logical choice is AIX because JAVA is optimized with the SDK on AIX.
- C. If an application is compiled to a specific operating environment, (Linux on POWER or AIX) it must run on that environment.
- D. If the application is enabled on Linux on Intel systems, it will run on Linux on POWER and not AIX.

Answer: C

14. Which of the following enables improved performance on the eServer p5?

- A. Low-k Dielectric and SOI technology
- B. Six floating point operations per second
- C. The ability to create a partition from a single processor
- D. 205 GB memory transfer on a system with a single memory card

Answer: A

15. A customer is running mission-critical applications on older pSeries systems. Their business is experiencing rapid and unpredictable growth, and they need 24 x 7 availability. Which compelling reason might convince this customer to purchase new eServer p5 systems?

- A. eServer p5 systems have micro-partitioning capability and offer more than twice the performance per processor compared to older pSeries systems.
- B. eServer p5 systems have greater virtualization capabilities and can support multiple advanced functions at no additional cost.
- C. eServer p5 systems are more scalable and can be clustered with older pSeries systems for ease of migration.
- D. eServer p5 systems provide better RAS, higher performance, and advanced functionality.

Answer: D

16. A customer requires management capabilities for installed pSeries systems via a browser-based PC. Which of the

following should be considered?

- A. TSM
- B. CSM
- C. WebSM
- D. LoadLeveler

Answer: C

17. A customer is centralizing their Fibre Channel disk systems and their Tape Libraries. Which of the following solutions will reduce their expenses and simplify the administration?

- A. SAN
- B. NAS
- C. TSM
- D. ESS

Answer: A

18. A large data center has a requirement to consolidate existing UNIX and Linux servers supporting commercial workloads. Which of the following advantages of the eServer p5 would be important in meeting this requirement?

- A. Multiple versions of AIX 5L running in individual LPARs
- B. Mainframe-inspired features (self-diagnosing/self-healing)
- C. The ability to produce five 9s availability with a single server
- D. The ability to create up to 254 dynamic partitions in a single system

Answer: D

19. Which customer scenario would be the best candidate for Virtual Storage Server in an eServer p5 environment?

- A. Customer is moving existing web servers from four Sun 280s to four IBM p5-520s
- B. Customer is consolidating two large databases currently running on p670s
- C. Customer is moving their payroll application from an S85 to a p5-570
- D. Customer is consolidating several application servers, currently running on 1-way B80s, to a p5-550 with several LPARs

Answer: D

20. An existing pSeries customer is concerned with their CPU and memory utilization for a database application. What features in the p5 architecture would address this problem?

- A. Micro-partitioning, Hypervisor, and Virtual storage
- B. CUoD, Hypervisor, and FFDC
- C. Partition Manager, SMP, and Virtualization Engine
- D. Micro-partitioning, CUoD, and SMT

Answer: D
