

Exam4Test 000-253 Exams

IBM Test253. IBM WebS.App.Svr.Network Development V6.1.Core Admn

Practice Exam: 000-253

Exam Number/Code: 000-253

Exam Name: Test253. IBM WebS.App.Svr.Network Development V6.1.Core Admn

Questions and Answers: 108 Q&As

Exam Description

Order : [000-253 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-253 Exam.

Exam4Test **Practice Exams** for 000-253 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **IBM certifications II** exam and get your **IBM certifications II Certification**.

We guarantee your success in the first attempt. If you do not pass the **IBM certifications II** "000-253" (Test253. IBM WebS.App.Svr.Network Development V6.1.Core Admn on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test IBM certifications II 000-253 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of IBM certifications II 000-253 exam provides everything which you need to pass your exam. The IBM certifications II Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-253 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Test253. IBM WebS.App.Svr.Network Development V6.1.Core Admn(IBM certifications II) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-253 exam.

000-253 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real IBM certifications II exam. 000-253 exam questions updated on regular basis.

Like actual IBM certifications II Certification exams, 000-253 exam preparation is in multiple-choice questions (MCQs). Tested by many real IBM certifications II exams before publishing.

Try free IBM certifications II exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 000-253 Exam: 100% Guarantee to Pass Your 000-253 exam and get your IBM certifications II Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your IBM certifications II Certification.

Exam4Test professional provides IBM certifications II 000-253 the newest Q&A, completely covers 000-253 test

original topic. With our completed IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-253 test on Your First Try, 100% Money Back Guarantee included!

000-253 Exam Study Guide

000-253 exam is regarded as one of the most favourite [IBM certifications II Certifications](#). Many IT professionals prefer to add 000-253 exam among their credentials. Exam4Test not only caters you all the information regarding the 000-253 exam but also provides you the excellent 000-253 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 000-253 exam

000-253 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-253 exam questions updated on regular basis

Same type as the certification exams, 000-253 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-253 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-253

Title : Test253. IBM WebS.App.Svr.Network Development V6.1.Core Admn

1. A cluster member has suddenly crashed. The administrator is concerned about aborted transactions holding locks in the database. What can an administrator do to release the locks?

- A. Unmount the shared file system such as a Network Attached Storage (NAS) where the transaction log is stored
- B. Restart the deployment manager and node agents who manage the transaction log
- C. Verify another running cluster member has access to the transaction log
- D. Reconnect the database where the transaction log is stored

Answer: C

2. When altering the level of logging information, which level provides more detailed logging information than the default (info) level?

- A. Fatal
- B. Warning
- C. Severe
- D. Config

Answer: D

3. Which set of parameters can a system administrator adjust to directly improve performance for the EJB container?

- A. Transaction lifetime and client inactivity timeout
- B. Cache size and cache cleanup interval
- C. Data source connection pool and server JVM size
- D. Session timeout and HTTP session object size

Answer: B

4. When the application server is experiencing normal to heavy usage, which statement most accurately describes optimal pool usage?

- A. The pools will all show similar numerical values, indicating balanced workload is occurring throughout the application server.
- B. Pools used by the application should be released and rebuilt in conjunction with JVM garbage collection cycles ensuring that no stale connections persist.
- C. The Performance Management Interface (PMI) must be explicitly enabled on the application server to be monitored since it requires CPU resources on the server being monitored.
- D. Pools used by the application should be nearly fully utilized, indicating that resources are being efficiently used.

Answer: D

5. When configuring a J2C connection factory, which setting can be configured using the administrative console?

- A. Container-managed authentication alias
- B. Component-managed authentication alias
- C. Authentication preference
- D. Mapping configuration alias

Answer: B

6. Which approach should be recommended when designing a production topology for WebSphere application servers providing high availability and failover capabilities?

- A. Create a design using multiple machines that handle the full production load, enabling the use of application server clustering to provide failover capabilities
- B. Utilize load balancers between the Web servers and the application servers to provide failover support at the application server tier
- C. Place the Authentication servers outside of the intrusion firewall with the Web servers, since the Web servers will need to access them
- D. Use the largest processor engines and least number of physical machines for the application server tier, to minimize the software licensing costs

Answer: A

7. Which two components provide workload management capabilities?

- A. Node agent
- B. Web server plug-in
- C. Caching proxy
- D. Deployment manager
- E. Load balancer

Answer: BE

8. An application has 15 concurrent users and a connection pool size of 10. Each user uses 3 prepared statements. For this application, what is the recommended prepared statement cache size?

- A. 10
- B. 15
- C. 30
- D. 45

Answer: C

9. What is needed to load balance the HTTP traffic across a cluster of Web servers?

- A. Configure a proxy server such as Tivoli Access Manager (TAM)
- B. Enable server affinity for each HTTP server in the cluster
- C. Implement the caching proxy server component of the WebSphere Edge
- D. Use an IP sprayer from the load balancing component of the WebSphere Edge Components

Answer: D

10. If an administrator configures session management for an application server to use SSL ID tracking, which two other session tracking mechanisms should also be enabled?

- A. Cookies
- B. URL Rewriting
- C. Security Integration
- D. Serial Access
- E. Java2 Security

Answer: AB

11. Which Web module parameter adjustments would result in improved response time for Web clients?

- A. Disable load on startup
- B. Enable pre-compile JSP option
- C. Set the distributable flag
- D. Set the reload interval to 20 seconds or less

Answer: B

12. Session Initiation Protocol (SIP) servlets are packaged in which type of archive file?

- A. SAR
- B. WAR
- C. JAR
- D. EJB-JAR
- E. SIP-JAR

Answer: A

13. An application server is using data source connections being managed thru connection pooling. However, the server is logging database errors resulting from lack of connections. In this context, what applies to tuning database connections?

- A. Data sources are abstracted from the JDBC drivers to permit database upgrades without impacting the application logic. The administrator should decrease the connection timeout value.
- B. The connection pool is managed by the application server container, so in addition to increasing the connection setting, additional connections allowed must be configured on the database.
- C. The data sources are released at the end of the commit phase when using Type 4 JDBC drivers. New connections will be created upon the next database access.
- D. It is necessary to tune the applications before tuning WebSphere application server. Connections not returned to the pool are often caused by programs not closing connections properly.

Answer: D

14. In a WebSphere cell configuration, which component is a single point of failure?

- A. Deployment manager
- B. Web container
- C. EJB container
- D. HTTP server

Answer: A

15. A J2EE application needs to be configured as follows:

The EJB module and the utility JAR in the application must be loaded by the same Class loader. Web module WAR1 and the EJB module must use the same Class loader and Web module WAR2 must have its own Class loader.

What is the correct Web module Class loader configuration for this application?

- A. WAR1 - Module, WAR2 - Module
- B. WAR1 - Module, WAR2 - Application
- C. WAR1 - Application, WAR2 - Application
- D. WAR1 - Application, WAR2 - Module

Answer: D

16. What functionality does the Caching Proxy server provide?
- A. Reverse proxy and content-based routing
 - B. Dynamic content caching and integration with servlet caching
 - C. File serving enabler
 - D. HTTP compression
 - E. Integration with Dynacache and third party object caches

Answer: AB

17. What is the correct syntax when running the backup configuration of administrative server files when WebSphere Security is enabled?

- A. backupConfig WebSphereConfig user <name> -password <password>
- B. backupConfig WebSphereConfig backup.zip nohalt user <name> -password <password>
- C. backupConfig WebSphereConfig -cell user <name> -password <password>
- D. backupConfig WebSphereConfig profilename=AppSrv01 user <name> -password <password>

Answer: A

18. Which Web server plug-in setting is NOT configurable using the administrative console?

- A. Load balancing option
- B. Retry interval
- C. Refresh configuration interval
- D. Minimum number of connections

Answer: D

19. Which services are implemented by the WebSphere application server?

- A. Security, JMS messaging, Naming and HTTP Plug-in
- B. The user registry, Naming and HTTP Plug-in
- C. HTTP Load Balancing service, JMS messaging and Data Replication Service (DRS)
- D. Security, Naming, Transaction and Dynamic Cache

Answer: D

20. What does a WebSphere application server provide to support the installation and deployment of JSR 168 compliant portlets?

- A. An embedded portlet container
- B. A scaled-down version of the WebSphere Portal Server
- C. Several J2EE applications that render and aggregate portlets in a browser
- D. An embedded version of WebSphere Portal Express

Answer: A
