IBM IBM Tivoli Storage Manager V5.5 Operator

Practice Exam: 000-432

Exam Number/Code: 000-432

Exam Name: IBM Tivoli Storage Manager V5.5 Operator

Questions and Answers: 124 Q&As

Exam Description

Order : [000-432 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-432 Exam.

Exam4Test **Practice Exams** for 000-432 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **IBM certifications III** exam and get your **IBM certifications III Certification**.

We guarantee your success in the first attempt. If you do not pass the **IBM certifications III** "000-432" (IBM Tivoli Storage Manager V5.5 Operator on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test IBM certifications III 000-432 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of IBM certifications III 000-432 exam provides everything which you need to pass your exam. The IBM certifications III Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-432 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first IBM Tivoli Storage Manager V5.5 Operator(IBM certifications III) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-432 exam.

000-432 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real IBM certifications III exam. 000-432 exam questions updated on regular basis.

Like actual IBM certifications III Certification exams, 000-432 exam preparation is in multiple-choice questions (MCQs). Tested by many real IBM certifications III exams before publishing.

Exam : IBM 000-432

Title : IBM Tivoli Storage Manager V5.5 Operator

1. Which command is issued to determine which client backups are running?

- A.query node
- B.query backups
- C.query process
- D.query session

Answer: D

2. What information is displayed by the query process command?

- A.an estimated completion time for each process
- B.the process numbers of all the processes running on the server
- C.the parent process of each process currently running on the server
- D.the IBM Tivoli Storage Manager (TSM) administrator who started each process on the server

Answer: B

3. Which command displays all logged messages from the last 60 minutes on the current day?

- A.query actlog
- B.query actlog search=all
- C.query actlog originator=server
- D.query actlog begindate=-1 begintime=-36

Answer: A

4. While reviewing the Daily Report, you find a scheduled restore job missed the allocated scheduled window.

Which two actions should be taken to determine the cause? (Choose two.)

- A. check to see if the file was backed up
- B. check to see if the storage pools are full
- C. check to see if any scratch tapes are available
- D. check to see if the client scheduler service is running on the client
- E. check the Activity Log to identify what was happening during the scheduled period

Answer: DE

5. Which command is used to determine the status of a scheduled backup?

- A. query event * *
- B. query backup * *
- C. query status * *
- D. query schedule * *

Answer: A

6. What happens when an operator accidentally attempts to check in a tape used for valid data with a status of scratch?

- A. The information on the tape will be overwritten.
- B. The tape is checked in with its status set to private.
- C. The tape is not checked in, and no data are overwritten.
- D. The operation will fail because the Write Protect tab is set.

Answer: C

7. Which command displays the backup action for the schedule named DBWeekly?

- A. query cloptset
- B. query node type=client f=d
- C. query session format=detail
- D. query schedule standard DBWeekly format=detail

Answer: D

8. What should you verify before running the audit library LIB1 checklabel=barcode command on your SCSI tape library?

- A. that library phone home mode has not been enabled
- B. that no processes are running or tapes are currently mounted
- C. that at least one tape drive is available for the audit library to use
- D. that the barcode scanner is working properly from the IBM Tivoli Storage Manager Administration Center

Answer: B

9. Where are preconfigured warning thresholds displayed within Operational Reporting?

- A. Threshold Summary
- B. Node Activity Log
- C. Issues and Recommendations
- D. Activity Log Summary

Answer: C

10. Which statement is true about a scratch volume?

- A. It is not in a storage pool.
- B. It does have its Write Protect tab set.
- C. It does not have its Write Protect tab set.
- D. It has TSM00001 written to the header of block 1.

Answer: A

11. Why would an operator issue the query mount command?

- A. to determine if a tape has damaged blocks

- B.to determine how much of a tape has been used
- C.to determine the volume serial number of the tape in a drive
- D.to determine how to move a tape and to which tape drive to move it

Answer: C

12. What information is displayed in response to a query mount command?

- A.a list of tape drives available for use
- B.tape drive and volume serial number
- C.a list of volumes awaiting operator intervention
- D.a count of tape mount failures in the previous interval

Answer: B

13. Which command provides information and statistics on a storage pool backup including primary pool, bytes backed up, unreadable files, unreadable bytes, and current output volume?

- A.query backup
- B.query process
- C.query clientstatus all
- D.query client node=

Answer: B

14. How can it be determined which scheduled client backups were missed in the last 24 hours?

- A.issue the command query schedule f=d
- B.select Reporting from the IBM Tivoli Storage Manager menu
- C.select the Client Schedule Status from the Reporting menu
- D.issue the command query event * * begintime=-24

Answer: D

15. Some activities are running late, and IBM Tivoli Storage Manager (TSM) server resources are running low. Which command prevents clients from establishing new workload on the server until the resource constraints are resolved?

- A.halt quiesce
- B.disable sessions
- C.enable events tivoli
- D.disable events tivoli

Answer: B

16. An IBM Tivoli Storage Manager (TSM) tape drive is not mounting tapes.

The operator issues a query drive command for the drive and finds that the drive is online.

What should the operator do next to determine the status of the drive?

- A.ping the drive to see if it responds
- B.issue the audit drive command for the drive
- C.check the Drive Status Panel of TSM Operational Reporting
- D.issue the query path command for the drive to make sure the path is online

Answer: D

17. Where can you locate information about all activity occurring on the IBM Tivoli Storage Manager (TSM) server?

- A.activity log
- B.syslog
- C.recovery log
- D.server status log

Answer: A

18. How can the estimated restore time of a clients files be determined?

- A.run the command query restoretime

- B. look at the backup statistics and double the time
 - C. click the Estimate function button for restores in the Backup/Archive Client
 - D. from the IBM Tivoli Storage Manager Administration Center Client panel, select Restore Estimate feature
- Answer: C

19. What could help performance for a very large file backup?

- A. NPBUFFersize
- B. COMMMTimeout
- C. DBPAGEShadow
- D. DRIVEAquireretry

Answer: B

20. In IBM Tivoli Storage Manager (TSM), what information does the query session command provide?

- A. start times for client sessions
- B. clients that are communicating with the TSM server
- C. Client Options that are being used by the TSM server
- D. how much data needs to be backed up to the TSM server

Answer: B
