

Exam4Test 000-634 Exams

IBM rational-object orienten analysis and design-part2

Practice Exam: 000-634

Exam Number/Code: 000-634

Exam Name: rational-object orienten analysis and design-part2

Questions and Answers: 72 Q&As

Exam Description

Order : [000-634 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-634 Exam.

Exam4Test **Practice Exams** for 000-634 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **IBM certifications II** exam and get your **IBM certifications II Certification**.

We guarantee your success in the first attempt. If you do not pass the **IBM certifications II** "000-634" (rational-object orienten analysis and design-part2) on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test IBM certifications II 000-634 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of IBM certifications II 000-634 exam provides everything which you need to pass your exam. The IBM certifications II Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-634 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first rational-object orienten analysis and design-part2(IBM certifications II) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-634 exam.

000-634 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real IBM certifications II exam. 000-634 exam questions updated on regular basis.

Like actual IBM certifications II Certification exams, 000-634 exam preparation is in multiple-choice questions (MCQs). Tested by many real IBM certifications II exams before publishing.

Try free IBM certifications II exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 000-634 Exam: 100% Guarantee to Pass Your 000-634 exam and get your IBM certifications II Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your IBM certifications II Certification.

Exam4Test professional provides IBM certifications II 000-634 the newest Q&A, completely covers 000-634 test

original topic. With our completed IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-634 test on Your First Try, 100% Money Back Guarantee included!

000-634 Exam Study Guide

000-634 exam is regarded as one of the most favourite [IBM certifications II Certifications](#). Many IT professionals prefer to add 000-634 exam among their credentials. Exam4Test not only caters you all the information regarding the 000-634 exam but also provides you the excellent 000-634 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 000-634 exam

000-634 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-634 exam questions updated on regular basis

Same type as the certification exams, 000-634 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-634 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-634

Title : Rational-object orienten analysis and design-part2

1. What pase defines generalization?

- A. A relationship in which one class shared the structure and /or behavior of one or more classes.
- B. The number of instances of a class related to one instance of another class.
- C. A specialized form of association in which a whole is related to its parts.
- D. The practice of separating the interface of a class from its implementation and hiding the implementation.
- E. The ability to hide many different implementations behind a single interface.

Answer: A

2. Which of the following is not a major milestones of the Rational Unified Process? (Select all that apply.)

- A. Lifecycle Architecture (LCA)
- B. Lifecycle Objective (LCO)
- C. Product Release
- D. Initial Operation Capability (IOC)
- E. Preliminary Design Review (PDR)

Answer: E

3. Which of the following are characteristics of software architecture? (Select all that apply.)

- A. Composition of structural and behavioral elements into progressively larger subsystems.
- B. Selection of the structural elements and their interfaces by which a system is composed.
- C. Behavior as specified in collaborations among those elements.
- D. Detailed user interface design.
- E. Architectural style that guides this organization, these elements and their interfaces, their collaborations, and their

composition.

Answer: ABCE

4. What is true of iterations?

- A. A lifecycle phase may contain many iterations.
- B. Iterations may contain many phases.
- C. A major milestone marks the end of every iteration.
- D. You establish plans for each phase, but not for iterations.
- E. A construction iteration cannot include any activities from the Requirements workflow.

Answer: A

5. Which of the following are phases in the Rational Unified Process? (Select all that apply.)

- A. Analysis
- B. Construction
- C. Transition
- D. Elaboration
- E. Inception

Answer: BCDE

6. Which of the following are characteristics of a supplier object in a client-supplier relationship? (Select all that apply.)

- A. You can reuse it independent of its existing clients.
- B. It is an instance of a subclass.
- C. It provides a service or handles a message.
- D. It invokes a service or sends a message.

Answer: AC

7. What is polymorphism?

- A. The ability to hide many different implementations behind a single interface.
- B. A specialized form of association in which a whole is related to its parts.
- C. The practice of hiding the implementation of a class from clients.
- D. A relationship in which one class shares the structure and/or behavior of one or more classes.
- E. A reference to the number of instances of a class related to one instance of another class.

Answer: A

8. What is an abstract class?

- A. A superclass for which no direct instances may be created.
- B. A class that logically exists beyond the scope of the program that created it.
- C. A class that manages the interface communications within a system or among different systems.
- D. A class whose instances are collections of other objects.
- E. A class that serves as a template for other classes.

Answer: A

9. Which of the following is not part of a use-case realization? (Select all that apply.)

- A. Sequence diagrams
- B. Use cases
- C. Collaboration diagrams
- D. Class diagrams

Answer: ACD

10. What characterizes a development case?

- A. An architectural design decision.
- B. A development cycle specifically devoted to maintenance.
- C. A tailoring of the Rational Unified Process to suit the needs of a particular project or organization.

- D. Another name for a key mechanism.
- E. One way of using the system.

Answer: C

11. What is a scenario? (Select all that apply.)

- A. A series of use cases that describe the functional requirements for the system.
- B. An instance of a use case.
- C. Something that has state, behavior, and identity.
- D. A set of time-ordered steps or statements expressed in natural language.

Answer: BD

12. Which is a step in the Describe the Run-time Architecture activity?

- A. Create Initial Design Classes
- B. Identify Processes and Threads
- C. Identify Events and Signals
- D. Allocate System Elements to Nodes

Answer: B

13. What characterizes a model?

- A. It is the same thing as a diagram.
- B. It is a complete description of a system from a particular perspective.
- C. It is rarely needed if an iterative lifecycle is used.
- D. It is not applicable to software development.

Answer: B

14. Modularity is the organization of a problem into different levels of abstraction.

- A. True
- B. False

Answer: B

15. What case defines an association class?

- A. Is primarily a construct used during detailed design.
- B. Specifies that a class has attributes and operations.
- C. Is represented with a second association line next to the original.
- D. Should not be represented on class diagrams during analysis.
- E. Specifies that in a many-to-many association, each link has attributes and possibly operations.

Answer: E

16. Stereotypes in the UML support generalization among model elements.

- A. True
- B. False

Answer: B

17. What is a container class?

- A. A class whose instances are collections of other objects.
- B. A class for which you may create no instances.
- C. A class that logically exists beyond the scope of the program that created it.
- D. A class that serves as a template for other classes.
- E. A class that manages the interface communications within a system or among different systems.

Answer: A

18. What are analysis mechanisms?

- A. A description of how the team will implement non-functional requirements.
- B. A means to capture and communicate the technically difficult aspects of a solution in a way that is

Implementation independent

C. The modeling guidelines that should be adhered to during Architectural Analysis.

D. The process the team should follow during Architectural Analysis.

Answer: B

19. What is a derived attribute?

A. An attribute whose value may be calculated based on the value of other attributes within the class.

B. The value of an attribute for a particular object.

C. An attribute that is retrieved from a database.

D. An attribute that is inherited from a superclass.

E. An attribute with a fixed value.

Answer: A

20. According to the principle of encapsulation, which of the following should be placed in the visible portion (or interface) of a class? (Select all that apply.)

A. Associations

B. Operations

C. Attributes

D. Realizations

Answer: B
