

Exam4Test 000-851 Exams

IBM iseries linux soluton sales v5r3

Practice Exam: 000-851

Exam Number/Code: 000-851

Exam Name: iseries linux soluton sales v5r3

Questions and Answers: 58 Q&As

Exam Description

Order : [000-851 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-851 Exam.

Exam4Test **Practice Exams** for 000-851 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **IBM certifications III** exam and get your **IBM certifications III Certification**.

We guarantee your success in the first attempt. If you do not pass the **IBM certifications III** "000-851" (iseries linux soluton sales v5r3 on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test IBM certifications III 000-851 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of IBM certifications III 000-851 exam provides everything which you need to pass your exam. The IBM certifications III Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-851 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first iseries linux soluton sales v5r3(IBM certifications III) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-851 exam.

000-851 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real IBM certifications III exam. 000-851 exam questions updated on regular basis.

Like actual IBM certifications III Certification exams, 000-851 exam preparation is in multiple-choice questions (MCQs). Tested by many real IBM certifications III exams before publishing.

Try free IBM certifications III exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 000-851 Exam: 100% Guarantee to Pass Your 000-851 exam and get your IBM certifications III Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your IBM certifications III Certification.

Exam4Test professional provides IBM certifications III 000-851 the newest Q&A, completely covers 000-851 test

original topic. With our completed IBM certifications III resources, you will minimize your IBM certifications III cost and be ready to pass your 000-851 test on Your First Try, 100% Money Back Guarantee included!

000-851 Exam Study Guide

000-851 exam is regarded as one of the most favourite [IBM certifications III Certifications](#). Many IT professionals prefer to add 000-851 exam among their credentials. Exam4Test not only caters you all the information regarding the 000-851 exam but also provides you the excellent 000-851 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 000-851 exam

000-851 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-851 exam questions updated on regular basis

Same type as the certification exams, 000-851 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-851 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-851

Title : Iseries Linux Soluton Sales v5r3

1. How is virtual disk I/O provided in an iSeries Linux partition?

- A. An independent disk storage pool (ASP) is assigned to Linux.
- B. An iSeries disk controller and associated drives are assigned to Linux.
- C. An OS/400 server storage space object is defined and assigned to Linux.
- D. iSeries service tools define a disk pool that is assigned to Linux.

Answer: C

2. An iSeries customer with an i810 is running the Apache Web server on a Linux partition. The users are not satisfied with the performance of the website. Which of the following is the proper course of action?

- A. Add a processor using CUoD.
- B. Upgrade the L2 cache memory on the i810 processor.
- C. Add a second Linux partition to balance the workload.
- D. Dynamically allocate additional CPW to the Linux partition.

Answer: D

3. An iSeries customer with an i810 is running SAMBA for file and print sharing on a Linux partition and is experiencing performance problems. Which of the following would most likely need additional resources to resolve this issue?

- A. L2 cache
- B. Disk
- C. Memory
- D. Network

Answer: C

4. What is the maximum number of active Linux partitions that are supported on an iSeries POWER4 processor?

- A. 1
- B. 4
- C. 10
- D. 31

Answer: C

5. A customer with an i825 is considering a three-tier CRM package with a DB2 database backend, Linux Apache, and browser access. Which of the following recommendations satisfies this need at the lowest cost?

- A. Implement LPAR with OS/400 and Linux partition with a separate server for Web access and firewall.
- B. Implement a Linux partition on the customer's existing iSeries and connect the partitions with the Virtual LAN
- C. Implement LPAR with two OS/400 partitions and a Linux partition and connect the partitions with their existing LAN
- D. Implement a dedicated Linux system with DB2 for Linux and the server function. Use a LAN link to the existing iSeries server.

Answer: B

6. An i830 customer is planning to implement a Linux partition on their existing system. Which of the following is the minimum requirement to implement a Linux partition?

- A. The i830 must be upgraded to an i825.
- B. Create a logical partition on the i830 containing at least .25 of a processor.
- C. Create a logical partition on the i830 containing at least one full processor.
- D. Create a logical partition on the i830 containing at least .10 of a processor.

Answer: C

7. Which of the following describes Linux implementation on an iSeries?

- A. Linux uses the iSeries Virtual storage.
- B. Linux runs in separate dedicated ASP.
- C. Linux runs on an iSeries with a Pulsar processor.
- D. Linux requires an iSeries system with more than one processor.

Answer: A

8. An iSeries customer has a model 810 processor with FC #2469 (2700 CPW). Processor utilization averages 75% or higher through the business day. Their customer website currently runs on an Intel processor-based system under Apache/Linux and utilizes Perl and Java, requiring several CPU cycles. The website accesses data from the iSeries. The customer wants to move the website onto the iSeries to leverage its reliability and provide a single-point backup solution.

Which of the following is the best solution for this customer?

- A. Move the website onto the Apache server under OS/400 on the current iSeries 810.
- B. Upgrade the processor to an eServer i5 520 FC #8955 (6000 CPW) and move the website onto the Apache server under i5/OS.
- C. Connect an xSeries model 445 (8870-42X) with four 3.0 GHz processors with an IXA. Run Linux on the xSeries to support the website.
- D. Upgrade the processor to an eServer i5 520 FC #8955 (6000 CPW) and move the website onto the Apache server on a Linux partition.

Answer: C

9. A customer with an i810 is considering adding a dedicated Linux server to host a new application. The current iSeries application has significant off-hour processing requirements, and the Linux application has large processing requirements during normal business hours. Which of the following would be an advantage of running Linux on iSeries?

- A. The OS/400 Dynamic resource allocation will move processor capacity as needed.
- B. The i810 provides On/Off Capacity on Demand support for Linux on iSeries.

- C. Adding a Linux partition to the existing iSeries can be implemented by activating a processor for Linux.
- D. Using OS/400 dynamic partition assignments, processor resources can be moved between OS/400 and Linux partitions on a scheduled basis.

Answer: D

10. A customer has an i820 FC #2437 (2-way SStar) with one DVD-RAM installed as the alternate IPL device. Three Linux partitions are planned: one for a firewall application and the others to host applications with occasional DVD requirements. What is the minimum required number of DVD-RAM drives to be added?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

11. A customer with a single eServer i5 520 is planning a file serving solution using SAMBA. Which of the following is an advantage of using Virtual storage on the iSeries?

- A. Existing disk drives can be leveraged.
- B. New high performance drives can be purchased for Linux.
- C. FastT storage can be attached to each Linux partition.
- D. Virtual storage can be managed with Management Central.

Answer: A

12. A customer has an i810 with two Linux partitions. Which of the following describes how the partitions communicate at lowest cost?

- A. Virtual LAN
- B. External LAN connections
- C. V.24 connection with a modem eliminator
- D. OS/400 Linux integration virtual console

Answer: A

13. A customer is considering a proposal to add Linux to their eServer i5 server to replace Windows infrastructure applications. Because this will be the first Linux server in the environment, what skill issues should be discussed?

- A. i5/OS and Linux integration minimize skill requirements.
- B. Managing Linux is very similar to managing Windows servers.
- C. Windows technicians currently supporting the infrastructure applications can be trained on Linux.
- D. The customer should hire additional Linux skills.

Answer: C

14. A global company wants to implement their WebSphere applications on an iSeries Linux partition. Which of the following distributions will allow the customer to minimize help desk time by offering a consistent code base for all geographies?

- A. Fedora
- B. Caldera
- C. Mandrake
- D. Red Hat

Answer: D

15. An iSeries customer with V5R2 plans to change I/O and memory resources in a Linux partition. Which of the following describes when the Linux partition must be restarted?

- A. When resources except memory are moved
- B. When memory resources are added or removed from the partition
- C. When processor resources are moved without using iSeries Navigator
- D. When processor resources are removed from the partition but not when resources are added

Answer: B
