IBM IBM Tivoli Storage Manager V5.4 Administration

Practice Exam: 000-894

Exam Number/Code: 000-894

Exam Name: IBM Tivoli Storage Manager V5.4 Administration

Questions and Answers: 106 Q&As

Exam Description

Order : [000-894 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-894 Exam.

Exam4Test **Practice Exams** for 000-894 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **IBM certifications II** exam and get your **IBM certifications II Certification**.

We guarantee your success in the first attempt. If you do not pass the **IBM certifications II** "000-894" (IBM Tivoli Storage Manager V5.4 Administration on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test IBM certifications II 000-894 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of IBM certifications II 000-894 exam provides everything which you need to pass your exam. The IBM certifications II Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-894 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first IBM Tivoli Storage Manager V5.4 Administration(IBM certifications II) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-894 exam.

000-894 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real IBM certifications II exam. 000-894 exam questions updated on regular basis.

Like actual IBM certifications II Certification exams, 000-894 exam preparation is in multiple-choice questions (MCQs). Tested by many real IBM certifications II exams before publishing.

Try free IBM certifications II exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 000-894 Exam: 100% Guarantee to Pass Your 000-894 exam and get your IBM certifications II Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your IBM certifications II Certification.

Exam4Test professional provides IBM certifications II 000-894 the newest Q&A, completely covers 000-894 test

original topic. With our completed IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-894 test on Your First Try, 100% Money Back Guarantee included!

000-894 Exam Study Guide

000-894 exam is regarded as one of the most favourite [IBM certifications II Certifications](#). Many IT professionals prefer to add 000-894 exam among their credentials. Exam4Test not only caters you all the information regarding the 000-894 exam but also provides you the excellent 000-894 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 000-894 exam

000-894 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-894 exam questions updated on regular basis

Same type as the certification exams, 000-894 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-894 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-894

Title : IBM Tivoli Storage Manager V5.4 Administration

1. The local Systems Engineer advises to mirror the TSM database. In order to find out how much space to allocate for mirroring, the current space used by the TSM database must be determined. What will accomplish this?

- A. Q DB
- B. DBSHOW
- C. SHOW DBFULL
- D. Q DB -ALLOCATED

Answer: A

2. The StartTime parameter is changed to the value of 01:00 on a schedule named DEV1_SEL_WEEKDAY associated to the DEV1 Windows node in the DEVELOPMENT domain. From the client machine, stopping and restarting the scheduler service on the node is done. What can be done to verify that a change has taken affect on the client?

- A. Query the activity log
- B. Wait for backup schedule notification
- C. Verify the next scheduled backup in the dsmsched.log
- D. Select schedule from nodes where sched_name=EV1_SEL_WEEKDAY?Select schedule from nodes where sched_name=?EV1_SEL_WEEKDAY

Answer: C

3. There are two TSM storage administrators working different shifts to support the storage environment. The TSM storage administrator working the morning shift checks the nightly scheduled backup report from the day before and notices the report only shows events for the current date. What is the likely cause of this problem?

- A. The storage administrator working the night shift issued the command SET EVENTRETENTION 0.
- B. The storage administrator working the night shift issued the command SET EVENTRETENTION 1.
- C. The storage administrator working the night shift issued the command SET ACTLOGRETENTION 0.
- D. The storage administrator working the night shift issued the command SET ACTLOGRETENTION 1.

Answer: A

4. The TSM storage administrator is exporting node data of a critical application server. The export must be complete by the end of the business day. Currently several processes are running that may cause an incomplete export. Which three might cause unpredictable results? (Choose three.)

- A. backup
- B. archive
- C. expiration
- D. collocation
- E. data interleaving
- F. database backup

Answer: ABC

5. When defining a TSM client schedule, what are the functions of DURATION and DURUNITS parameters?

- A. to specify how long the backup job can run.
- B. to specify the date after which the schedule is no longer used
- C. to specify that the startup window can begin on any day of the week
- D. to specify the length of time the startup window remains open to begin processing the schedule

Answer: D

6. Active-data pools can be collocated on sequential-access disk to optimized access to active data versions for fast restore. Select two methods data can be copied to active data pools. (Choose two).

- A. Active data is written to an active data pool using simultaneous write.
- B. Active data is copied to an active data pool using multi-threaded backups.
- C. Active data is copied to an active data pool using the COPY ACTIVE DATA command.
- D. Active data is moved to an active data pool using the MOVE ACTIVE DATA command.
- E. Active data is moved to an active data pool using the MOVE DATA TYPE=ACTIVE command.

Answer: AC

7. Which command should you use to control the type of data transfer path a client uses for (LAN-Free and/or LAN) backups?

- A. UPDATE NODE
- B. UPDATE PATH
- C. UPDATE LANFREE
- D. UPDATE DEVCLASS

Answer: A

8. A local backup set was created on a server. The data owner wants to use the table of contents to restore a specific file. How can the data owner use the table of contents feature?

- A. The table of contents only displays the directory level.
- B. The table of contents expands to show individual files.
- C. The table of contents is not supported for local backup set restore.
- D. The table of contents is only displayed for local backup sets after issuing the GENERATE BACKUPSETTOC command.

Answer: C

9. In response to a problem, IBM Tivoli Support Level 2 requests that system information from the TSM server be placed in a file and sent to them. What is the best way to create this file?

- A. Q SYS > system.out
- B. Q SYSTEMINFO > system.out

- C. Q SYS f=d -receiver=file -objectname=system.out
- D. SET SYSREPORT ON output=file filename=system.out

Answer: A

10. Which of the following commands allows the allocation of space, and creation of a database volume, in a single command?

- A. dsmfmt dbv d:dbvol size=100
- B. dsmfmt dbvol d:dbvol formatsize=100
- C. define dbvolume d:dbvol formatsize=100
- D. define volume d:dbvol type=db formatsize=100

Answer: C

11. How much database space is required for each version of a file in the primary stgpool?

- A. 200 to 400 bytes
- B. 400 to 600 bytes
- C. 300 to 400 bytes
- D. 100 to 300 bytes

Answer: A

12. A TSM storage administrator has (2) 1.8 GHz CPU Windows file servers with 4 filesystems each on 4 separate disk drives, a 1Gb high-speed network connection to the TSM server and a 6 hour backup window during which no other applications are running. The management class in use is already configured to point to a tape stgpool and sufficient client sessions are available. Which two options / parameters must be configured in order to ensure that a multi-session backup will be performed where (2) sessions will send data to the TSM server tape stgpool simultaneously? (Choose two.)

- A. The KEEPMP parameter for this client node must be enabled.
- B. RESOURCEUTILIZATION must be set to 3 or higher on the client.
- C. RESOURCEUTILIZATION must be set to 2 or higher on the client.
- D. The MAXNUMMP parameter for this client node must be set to 2 or higher.
- E. The MAXNUMMP parameter for this client node must be set to 1 or higher.

Answer: BD

13. The RETMIN parameter in the archive copy group specifies:

- A. The minimum number of days an object is retained after an object is archived.
- B. The minimum number of retries that will occur before an archive operation fails.
- C. The minimum number of versions of an object that will be retained in server storage.
- D. The minimum number of days an object is retained after an event trigger is issued for files that are managed by event-based retention.

Answer: A

14. A colleague at a remote location sends the TSM storage administrator an e-mail displaying the contents of a very useful multi-line server script. The local TSM server is running on AIX and the TSM storage administrator uses the administrative command line interface on a Windows desktop. How can the TSM storage administrator easily load this new server script into the TSM server that the administrator manages and ensure the script can be reused?

- A. run the script using the command line
- B. copy the script to the windows clipboard and paste it into the command line
- C. save the script in a text file and run the command: DEFINE SCRIPT COOLSCRIPT FILE=C:script.txt
- D. save the script in a text file on the TSM server and run the command: DEFINE SCRIPT COOLSCRIPT FILE=/tmp/script.txt

Answer: C

15. What should you use with the archive command to specify the available management class for your policy domain to which you want to bind your archived files and directories?

- A. -dirmc

- B. -archpd
 - C. -bindmc
 - D. -archmc
- Answer: D

16. To inform the server about a drive that can be used to access storage volumes, issue the DEFINE DRIVE command, followed by:

- A. the DEFINE PATH command
- B. the DEFINE LIBRARY command
- C. the DEFINE VOLUME command
- D. the DEFINE ACCESS command

Answer: A

17. From the client machine, a TSM administrator with policy privilege needs to make a change to the daily schedule for backups and needs to ensure that it will take effect tonight. What is the first thing that this administrator must do in order for this change to take place?

- A. Log into the TSM Server and select Enhanced Scheduling in the ISC.
- B. Install or ensure that the Administrative Command line is on the client machine.
- C. Using the ISC, edit the Daily Schedule and then select take effect "Immediately".
- D. Using the BA Client GUI, edit the schedule and then restart the service or daemon.

Answer: B

18. Files may be initially placed on different storage pools according to the desired storage management policy. What are two benefits of automatically moving data to other devices? (Choose two)

- A. Space utilization.
- B. Secondary storage pools are backed up faster.
- C. Recovery performs faster on removable media.
- D. Data is moved to less expensive device classes for cost savings.
- E. Secondary storage pools require less security than primary storage pools.

Answer: AD

19. The TSM server is not running. Based on the errors, the problem appears to be a full TSM log. This is the first time this has happened. You perform the necessary procedures to get the server running again. Which two queries help in identifying the root cause of the problem? (Choose two.)

- A. QUERY DRIVE
- B. QUERY ACTLOG
- C. QUERY LIBRARY
- D. QUERY FILESPACE
- E. QUERY CLIENT ERROR LOG

Answer: AB

20. The TSM storage administrator notices that the size of the log that stores client processing errors keeps growing. Which option should be modified to prevent this from happening in the future?

- A. LOGPOOLSIZE
- B. ERRORLOGSIZE
- C. ERRORLOGRETENTION
- D. LOGWARNFULLPERCENT

Answer: C
