Answer: DE

10. A new employee has been hired by Company A to fill a new function as a global LDAP administrator. This employee will also be responsible for performing tasks within the payroll system and performing updates in the sales

system.

Company A is using IBM Tivoli Identity Manager (ITIM) V5.0 to provision new users into the corporate information technology resources shortly after they have been hired. Some resources have restricted access and require specific approvals or other information before a new user account is created.

User accounts will be provisioned for all new users appearing in the HR feed that IBM Tivoli Identity Manager V5.0 receives on these target systems:

- Active Directory
- Enterprise LDAP User
- Exchange

These target systems require the user first-line manager approval before the account is provisioned:

- Payroll
- Human Resources

These target systems require the system owner approval before the account is provisioned:

- Purchasing
- Sales

These account types for the Enterprise LDAP require approval from the Information Technology Risk group. The Information Technology Risk group is also required to submit additional information regarding justification for the account:

- Account types
 - # Administrator
 - # Back Operator
 - # Global Administrator
 - # Superuser
- Justification
 - # Replacement support role
 - # New function # Business requirement
 - # Other: Explain

Approvers are given 24 hours to take action on an approval request (either approve or reject). If no action is taken within 24 hours, the approval request is escalated to the Service Desk for manual intervention. The Service Desk will manually reassign the request to a peer approver (as designated in Company A's quarterly organizational chart), if available, or reject the request. Rejection by any one approver will affect only the account under that approver domain of approval.

What additional information will the Information Technology Risk group be required to provide?

- A. Justification
- B. Account Type
- C. Account Attributes
- D. First Line Manager

Answer: A

11. The account and password design document indicates that new accounts and passwords are initially set up by a designated security officer. Therefore, the notification is sent to the security officer and is not sent to each account owner. Which two options can be configured to meet this requirement? (Choose two.)

- A. Modify the existing e-mail notification templates to add the custom recipient.
- B. Configure a mail node in the operation workflow where the participant is a person with an e-mail account.
- C. Design a new e-mail notification template and add to the list of available workflow notification templates.
- D. The IBM Tivoli Identity Manager administrator would disable the New Account Notification template and the New Password template in Configuration > Properties > Notification Templates.
- E. The IBM Tivoli Identity Manager administrator would disable the New Account Notification template and the New Password template in Configure System > Workflow Notification Properties.

- C. In the shipped product, default groups and default ACLs reflect the typical needs of administrative users in ITIM.
- D. Members of the default Auditor group need additional ACLs only to manage their directly defined subordinates in ITIM.

E. Access owners can access the basic services relating to their defined target group Accesses without the need for additional ACIs.

Answer: CE

19. The Business Continuity Review describes the system availability characteristics of the solution design. In a typical high availability (HA) configuration, a load balancer is configured in front of several peer masters for the directory server. Which statement is true regarding load balancing in an IBM Tivoli Identity Manager (ITIM) HA solution design?

- A. If a primary master goes down, all traffic to that master is held until the master is available.
- B. Load balancing of write traffic is unwise, because it leads to a possibility of an update conflict.
- C. If the primary system goes down, the remaining systems do not need to be able to bear the work load.
- D. The ITIM dataservices component will assist the load balancer in the redirecting of requests to one of the other replicated ITIM servers.

Answer: B

20. Which test phase should occur first in an IBM Tivoli Identity Manager (ITIM) acceptance plan?

- A. system testing
- B. functional testing
