IBM Power Systems Technical Support for i

Practice Exam: 000-974

Exam Number/Code: 000-974

Exam Name: Power Systems Technical Support for i

Questions and Answers: 89 Q&As

Exam Description

Order : [000-974 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-974 Exam.

Exam4Test **Practice Exams** for 000-974 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **IBM certifications I** exam and get your **IBM certifications I Certification**.

We guarantee your success in the first attempt. If you do not pass the **IBM certifications I** "000-974" (Power Systems Technical Support for i on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test IBM certifications I 000-974 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of IBM certifications I 000-974 exam provides everything which you need to pass your exam. The IBM certifications I Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-974 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Power Systems Technical Support for i(IBM certifications I) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-974 exam.

000-974 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real IBM certifications I exam. 000-974 exam questions updated on regular basis.

Like actual IBM certifications I Certification exams, 000-974 exam preparation is in multiple-choice questions (MCQs) Tested by many real IBM certifications I exams before publishing.

Try free IBM certifications I exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 000-974 Exam: 100% Guarantee to Pass Your 000-974 exam and get your IBM certifications I Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your IBM certifications I Certification.

Exam4Test professional provides IBM certifications I 000-974 the newest Q&A, completely covers 000-974 test

original topic. With our completed IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-974 test on Your First Try, 100% Money Back Guarantee included!

000-974 Exam Study Guide

000-974 exam is regarded as one of the most favourite [IBM certifications I Certifications](#). Many IT professionals prefer to add 000-974 exam among their credentials. Exam4Test not only caters you all the information regarding the 000-974 exam but also provides you the excellent 000-974 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 000-974 exam

000-974 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-974 exam questions updated on regular basis

Same type as the certification exams, 000-974 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-974 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-974

Title : Power Systems Technical Support for i

1. A Power 520 customer is implementing a new application and requires continuous network connectivity. Which of the following solutions will enable fault-tolerant connection?

- A. Add a second LAN card and team them together using virtual IP and Proxy ARP.
- B. Add a second LAN card and use Network Dispatcher to manage failover functions.
- C. Create a virtual LAN with multiple virtual interfaces in the event of port failure.
- D. Use both ports on the embedded LAN to set up virtual IP interfaces and bind them together

Answer: A

2. Which of the following will allow a customer to display and monitor FC #7109 PDU+ energy usage data at various times of the day via Ethernet connection to a PC?

- A. Management Central
- B. Display Power Management (DPM)
- C. Systems Director Navigator for i5/OS
- D. Systems Director Active Energy Manager

Answer: D

3. Historical performance data can be imported into the Workload Estimator tool from which of the following sources?

- A. IBM Director
- B. Performance menu
- C. System i Navigator
- D. PM for Power Systems

Answer: D

4. A customer's nightly processing window must shrink from 4 hours to 2 hours. Which of the following methods will provide information needed to help address this requirement?

- A. Use iDoctor heap analysis to evaluate batch job memory usage.
- B. Turn on Collection Services. Evaluate system changes using this data.
- C. Set up a performance monitor through Management Central and evaluate the resulting performance collections.
- D. Run Work with Active Jobs (WRKACTJOB) with automatic refresh interval. Evaluate I/O performance during the nightly window.

Answer: B

5. What color are the connectors for HSL-1, HSL-2 and 12X?

- A. HSL-1: black, HSL-2: orange, 12X: green
- B. HSL-1: yellow, HSL-2: black, 12X: green
- C. HSL-1: yellow, HSL-2: orange, 12X: black
- D. HSL-1: orange, HSL-2: black, 12X: yellow

Answer: B

6. A customer with a POWER5 525 has 6 drives in the CEC and wants to migrate to a new Power 520. Which of the following is the easiest way to migrate this configuration?

- A. Install all 6 drives from the 525 CEC into the Power 520 CEC.
- B. Connect both systems to the same HMC. Use the Dedicated Service Tools (DST) Migrate While Active option.
- C. Using the FC #5172 SAS conversion cable, migrate all the SCSI drives, as an intact RAID array, to the new machine.
- D. Using an HMC and a FC #5095 expansion unit, move the drives from the 525 to the FC #5095 expansion unit. Then connect the FC #5095 expansion unit to the Power 520 mark it as the load source location.

Answer: D

7. A customer running a model 810 is experiencing application performance issues. They are considering migrating to a new Power Systems server. The PM iSeries reports show all green lights and do not show an upward trend into yellow or red conditions.

Which of the following will provide more accurate performance metrics?

- A. Use the PM400 menu to change the collection interval, use the "refresh" option to resend the data, and rerun the reports.
- B. In System i Navigator, Collection Services, set the PM eServer iSeries trend analysis to ""trend current performance collection,"" and rerun the report.
- C. Use Collection Services to collect performance data. Change the default collection criteria to a short collection period and analyze those collections.
- D. In the PM400 menu, verify that the remote systems location includes the IBM PM iSeries system, use the "refresh" option to resend the data, and rerun the reports.

Answer: C

8. A customer has a model 800 running V5R3. They have some internal fixed-function terminal users, some client-server application, and provide web access for their external customers.

A migration to a new model M25 Express with user based IBM i licensing is planned.

Which of the following will estimate the number of entitlements needed on the new system?

- A. Run the RTVORDINF command
- B. Run IBM DSPESTUSR tool on the model 800
- C. Display details on WRKLICINF for 5722-SS1 FC #5050 on the model 800
- D. Use DSPUSRPRF *ALL to an outfile, then run a query to count all enabled user profiles.

Answer: B

9. A customer is migrating from a 270 to a one-core Power 520 with V5R4M5 and has the following requirements:
LTO-4 for backups on the new 520

LAN console

One internal modem

Which of the following features provides the correct configuration?

- A. One FC #5736 Tape IOA and one FC #2893 2-line WAN IOA.
- B. One FC #5746 internal tape and one FC #9793 2-line WAN IOA.
- C. One FC #5775 Tape IOA and one FC #2893 IOPLess 2-line WAN IOA.
- D. One FC #5746 internal tape and one FC #2893 IOPLess 2-line WAN IOA.

Answer: D

10. An IT Director would like a short overview of the migration process from an 810 at V5R4M5 to a JS23 blade. After upgrading to V6R1, which of the following describes the IBM recommended migration process?

- A. The 810 is migrated using normal save and restore procedures and compatible tape drives on the model 810 and the JS23.
- B. A full save of the 810 is performed to virtual tape. The virtual tape image is then copied to VIOS and restored to the JS23 blade.
- C. The BladeCenter is installed with SLIC and base OS. User data is saved to virtual tape on the SAN and reloaded into the JS23 blade.
- D. A full save performed to a virtual DVD. The virtual DVD image is copied to VIOS on the JS23 blade. The V6R1 partition is IPLed from the DVD image and the environment is loaded into the partition.

Answer: D
