

Exam4Test 310-015 Exams**SUN SUN CERTIFIED SYSTEM ADMINISTRATOR FOR SOLARIS 9 PART II**

Practice Exam: 310-015

Exam Number/Code: 310-015

Exam Name: SUN CERTIFIED SYSTEM ADMINISTRATOR FOR SOLARIS 9
PART II

Questions and Answers: 290 Q&As

Order : [310-015 Exam](#)

Exam Description

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 310-015 Exam.

Exam4Test **Practice Exams** for 310-015 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **SCSA9 SCNA9** exam and get your *SCSA9 SCNA9 Certification*.

We guarantee your success in the first attempt. If you do not pass the **SCSA9 SCNA9** "310-015" (SUN CERTIFIED SYSTEM ADMINISTRATOR FOR SOLARIS 9 PART II) on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test SCSA9 SCNA9 310-015 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of SCSA9 SCNA9 310-015 exam provides everything which you need to pass your exam. The SCSA9 SCNA9 Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "310-015 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first SUN CERTIFIED SYSTEM ADMINISTRATOR FOR SOLARIS 9 PART II(SCSA9 SCNA9) exam try, but also save your valuable time.

Comprehensive questions with complete details about 310-015 exam.

310-015 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real SCSA9 SCNA9 exam. 310-015 exam questions updated on regular basis.

Like actual SCSA9 SCNA9 Certification exams, 310-015 exam preparation is in multiple-choice questions (MCQs). Tested by many real SCSA9 SCNA9 exams before publishing.

Try free SCSA9 SCNA9 exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 310-015 Exam: 100% Guarantee to Pass Your 310-015 exam and get your SCSA9 SCNA9 Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your SCSA9 SCNA9 Certification.

Exam4Test professional provides SCNA9 SCNA9 310-015 the newest Q&A, completely covers 310-015 test original topic. With our completed SCNA9 SCNA9 resources, you will minimize your SCNA9 SCNA9 cost and be ready to pass your 310-015 test on Your First Try, 100% Money Back Guarantee included!

310-015 Exam Study Guide

310-015 exam is regarded as one of the most favourite [SCNA9 SCNA9 Certifications](#). Many IT professionals prefer to add 310-015 exam among their credentials. Exam4Test not only caters you all the information regarding the 310-015 exam but also provides you the excellent 310-015 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 310-015 exam

310-015 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

310-015 exam questions updated on regular basis

Same type as the certification exams, 310-015 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : SUN 310-015

Title : Sun Certified System Administrator for Solaris 9 part II

1. Solaris Volume Manager offers advantages over storing data in traditional disk slices. What are two of these advantages? (Choose two.)

- A. It facilitates the rotational interleaving of data.
- B. It enables the definition of disk usage patterns.
- C. It offers the possibility of significant performance improvement.
- D. It manages the data to ensure that disk failure does not automatically lead to data loss.

Answer: CD

2. Under which two conditions will the automounter automatically mount resources listed in an AutoFS direct map? (Choose two.)

- A. only if the mount point has first been created
- B. only if the resources are to be mounted read-only
- C. only if the reference used in the direct map uses relative path names
- D. only if an entry for the direct map has been added to the master map
- E. only if the reference used in the direct map uses absolute path names

Answer: DE

3. The default run level is 3 and the host is configured as an NFS server with valid entries in /etc/dfs/dfstab. Which two command strings restart NFS services? (Choose two.)

- A. init 6
- B. pkill -HUP inetd
- C. /etc/init.d/nfs.server restart

D. /etc/init.d/nfs.server stop;/etc/init.d/nfs.server start

Answer: AD

4. Which command should be used to create a file system on a virtual volume (d0) under Solaris Volume Manager control?

A. newfs /dev/rdisk/d0

B. newfs /dev/rdisk/md/d0

C. newfs /dev/md/rdisk/d0

D. newfs -F sds /dev/rdisk/d0

Answer: C

5. You have a system used for application development. The process app-rev23 owned by user epiphylla terminates abnormally. Which two effects can the root user configure? (Choose two.)

A. The process app-rev23 produces no core file at all.

B. The process app-rev23 produces a core file without the string "core" appearing anywhere within the file name.

C. The process app-rev23 produces a global core file readable by any user in a global /var/corefiles directory.

D. The process app-rev23 produces a total of three core files, one in the current directory of the process, one in epiphylla's home directory, and one in a global /var/corefiles directory.

Answer: AB

6. You have Solaris Volume Manager installed on your system and want to create your first metadevice. What initial action must you take?

A. run a command to create the first state database

B. run a utility to add a license to enable SVM for Solaris 9

C. run a command to initialize the configuration metadevice

D. run the vxinstall utility to initialize the volume manager software for use

E. create a soft partition using the -s initialize option with the appropriate command

Answer: A

7. You want to automatically mount an NFS resource. You also want to mount the NFS resource so that if the server becomes unavailable, and the client reboots, system initialization will continue without waiting for the resource to mount. Which mount option can be added to the client's /etc/vfstab file to achieve this?

A. fg

B. ro

C. bg

D. intr

E. soft

F. hard

Answer: C

8. You are working on a system connected to the network. You attempt to access a directory which you know is provided to your system using NFS, and which you have not accessed for some time. Your system displays the message:

stale NFS file handle

What is a possible cause of this problem?

A. The lockd daemon on the local system is no longer running.

B. The mountd daemon on the local system has out of date configuration information.

C. The automountd daemon has not been informed of changes to the automount maps.

D. The file or directory has been removed on the NFS server without the client's knowledge.

Answer: D

9. You have two 50-MByte UFS file systems, one located on a single disk, and the other located on a RAID 1 mirror. Both file systems are full. The RAID 1 mirror uses a round-robin read policy. Statistically, which is true of the RAID 1 mirror when reading data?

- A. The mirror is faster.
- B. The mirror is slower.
- C. Round-robin read policies are not allowed.
- D. The mirror and single disk exhibit the same performance.

Answer: A

10. In which situation will Solaris Volume Manager volumes continue to function normally in the event of the corruption of one copy of its state database?

- A. Solaris Volume Manager volumes will function normally if the master copy of the state database is not corrupted.
- B. Solaris Volume Manager volumes will function normally if the copy of the state database on the boot disk is available.
- C. Solaris Volume Manager volumes will function normally if no more than a single copy of the state database is corrupted.
- D. Solaris Volume Manager volumes will function normally if more than half of the copies of the state database are available.

Answer: D

11. Which two are functions of an NFS client? (Choose two.)

- A. runs the nfsd daemon
- B. makes resources available over the network
- C. mounts remote resources across the network
- D. is configured using the /etc/dfs/dfstab file
- E. mounts a remote resource and uses it as though it were local

Answer: CE

12. You are working on a system connected to the network. You are attempting to access a currently mounted NFS directory. Your system displays the message:

nfs mount: host1: : NFS: Service not responding

nfs mount: retrying: /usr/share/man

What can you do to solve this problem?

- A. ensure that nfsd is running on the NFS server
- B. ensure that mountd is running on the NFS server
- C. send a HUP signal to inetd process on the NFS server
- D. send a HUP signal to the rpcbind process on the NFS server

Answer: A

13. What can be added to the /etc/vfstab file to automatically mount the /var directory from the NFS server saturn onto the mount point /test during boot?

- A. /var - /test nfs - yes -
- B. saturn:/var - /test - yes -
- C. saturn:/var - /test nfs - yes
- D. saturn:/var /test nfs yes
- E. saturn:/var - /test nfs - yes -

Answer: E

14. The /etc/dfs/dfstab file on your Solaris system contains the entries:

share -o log=global /export/home

share -o ro /opt/NSCPcom

What is the purpose of the entry global?

- A. It specifies that all NFS transactions are logged in the /var/adm/global file.
- B. It specifies the tag to send to the syslogd daemon when logging the NFS share.
- C. It specifies the logging configuration to use from the NFS logging configuration file.
- D. It specifies the file in the /export/home directory in which to record NFS mount requests.

Answer: C

15. An inexperienced administrator reports to you that they would like to see if a system is a functioning native LDAP client. You suggest that they run a command to verify that the system is configured as a native LDAP client. Which command should you suggest?

- A. Idaplist
- B. Idapclient -v
- C. Idapadd client
- D. Idapsearch client

Answer: A

16. The auto_home automount map is an example of which type of map?

- A. xfn
- B. direct
- C. master
- D. generic
- E. indirect

Answer: E

17. After creating and adding additional swap space, what should you do to ensure that the swap space is available following subsequent reboots?

- A. You add it as a line entry to the /etc/vfstab file.
- B. You modify the startup scripts to include a swap add command.
- C. The additional swap space cannot be made available following subsequent reboots.
- D. No additional steps are required because the necessary changes are made to the startup file when the swap space is added.

Answer: A

18. You are receiving error messages that the /lard file system is full. You check and see that it has a large file called swapfile. Your system has more than enough swap space. You suspect that the file is in use as swap space. Which sequence of commands confirms that the file was in use as swap space, and helps correct the file system problem?

- A. swap -r /lard/swapfile ; rm /lard/swapfile
- B. swap -l ; swap -d /lard/swapfile ; rm /lard/swapfile
- C. swap -l ; rm /lard/swapfile ; swap -d /lard/swapfile
- D. swap -l ; swap -r /lard/swapfile ; rm /lard/swapfile

Answer: B

19. While configuring NIS on a system, you execute the command string:

```
# domainname testlab.Region.Org.COM
```

Which two statements about this command are true? (Choose two.)

- A. The server's name is testlab, and it resides in the region.org.com domain.
- B. Executing this command populates the /etc/defaultdomain file with the domain name.
- C. The domain name is case sensitive, and must be configured exactly as specified on this command-line.
- D. The domain name is the entire character string testlab.Region.Org.COM, and no DNS domain is specified.

Answer: CD

20. Interleave size is a tunable parameter associated with which three levels of RAID? (Choose three.)

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 0+1

Answer: ACD
