

**Exam4Test 310-036 Exams****SUN SUN CERTIFIED JAVA 2 PROGRAMMER 1.4 UPGRADE**

**Practice Exam:** 310-036

**Exam Number/Code:** 310-036

**Exam Name:** SUN CERTIFIED JAVA 2 PROGRAMMER 1.4 UPGRADE

**Questions and Answers:** 66 Q&As

**Exam Description**

Order : [310-036 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 310-036 Exam.

Exam4Test **Practice Exams** for 310-036 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **SCJP** exam and get your *SCJP Certification*.

We guarantee your success in the first attempt. If you do not pass the **SCJP** "310-036" (SUN CERTIFIED JAVA 2 PROGRAMMER 1.4 UPGRADE) on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test SCJP 310-036 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of SCJP 310-036 exam provides everything which you need to pass your exam. The SCJP Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "310-036 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first SUN CERTIFIED JAVA 2 PROGRAMMER 1.4 UPGRADE( SCJP ) exam try, but also save your valuable time.

Comprehensive questions with complete details about 310-036 exam.

310-036 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real SCJP exam. 310-036 exam questions updated on regular basis. Like actual SCJP Certification exams, 310-036 exam preparation is in multiple-choice questions (MCQs). Tested by many real SCJP exams before publishing.

Try free SCJP exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 310-036 Exam: 100% Guarantee to Pass Your 310-036 exam and get your SCJP Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your SCJP Certification.

Exam4Test professional provides SCJP 310-036 the newest Q&A, completely covers 310-036 test original topic. With our completed SCJP resources, you will minimize your SCJP cost and be ready to pass your 310-036 test on Your First Try, 100% Money Back Guarantee included!

## 310-036 Exam Study Guide

310-036 exam is regarded as one of the most favourite [SCJP Certifications](#). Many IT professionals prefer to add 310-036 exam among their credentials. Exam4Test not only caters you all the information regarding the 310-036 exam but also provides you the excellent 310-036 study guide which makes the certification exam easy for you.

### Exam4Test Engine Features

Comprehensive questions and answers about 310-036 exam

310-036 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

310-036 exam questions updated on regular basis

Same type as the certification exams, 310-036 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 310-036 exam demo before you decide to buy it in Exam4Test.com

### Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : SUN 310-036

Title : SUN CERTIFIED JAVA 2 PROGRAMMER 1.4 UPGRADE

1. `System.out.println(" baz = " + baz);`

What is the result?

A. baz = 0

B. baz = 1

C. baz = 2

D. Compilation fails.

E. An exception is thrown at runtime.

Answer: B

2. Click the Exhibit button.

What is the result?

A. 0

B. 3

C. Compilation fails.

D. An exception is thrown at runtime.

Answer: A

3. Given:

11. `public static void main( String[] args ) {`

12. `Integer a = new Integer(10);`

13. `Integer b = new Integer(10);`

14. `Integer c = a;`

15. `int d = 10;`

16. `double e = 10.0;`

17. `}`

Which three evaluate to true? (Choose three.)

- A. (a == c)
- B. (d == e)
- C. (b == d)
- D. (a == b)
- E. (b == c)
- F. (d == 10.0)

Answer: ABF

4. What happens when thread X executes a wait() method on object A, without owning object A's lock?

- A. Compilation fails.
- B. An exception is thrown.
- C. The wait() method has no effect.
- D. Thread X receives the lock immediately.
- E. Object A moves the thread to the wait pool.

Answer: B

5. Which statement is true?

- A. To call the join() method, a thread must own the lock of the current thread.
- B. To call the sleep() method, a thread must own the lock of the current thread.
- C. To call the yield() method, a thread must own the lock of the current thread.
- D. To call the notify() method, a thread must own the lock of the current thread.
- E. To call the notify() method, a thread must own the lock of the object on which the call is to be made.

Answer: E

6. int baz = bar + index;

15. System.out.println(" baz = " + baz);

What is the result?

- A. baz = 0
- B. baz = 1
- C. baz = 2
- D. Compilation fails.
- E. An exception is thrown at runtime.

Answer: B

7. Given:

21. int i = 1;

22. int j = i++;

23. if ((i == ++j) | (i++ == j)) {

24. i += j;

25. }

26. System.out.println("i = " + i);

What is the result?

- A. i = 1
- B. i = 2
- C. i = 3
- D. i = 4
- E. i = 5
- F. Compilation fails.

Answer: E

8. Given:

1. interface I0 {

2. public int method1(int x, int y);

3. public long method1(long x, long y);

4. }

Which compiles?

- A. interface I1 extends IO { }
- B. interface I1 implements IO { }
- C. abstract class C1 extends IO {  
public int method1(int x, int y) { return 0; }  
}
- D. abstract class C1 implements IO {  
public int method1(int x, int y) { return 0; }  
public short method1(long x, long y) { return 0; }  
}
- E. class C1 implements IO {  
public int method1(int x, int y) { return 0; }  
public short method1(long x, long y) { return 0; }  
}

Answer: A

9. Which statement is true?

- A. If only one thread is blocked in the wait method of an object, and another thread executes the notify method on that same object, then the first thread immediately resumes execution.
- B. If a thread is blocked in the wait method of an object, and another thread executes the notify method on the same object, it is still possible that the first thread might never resume execution.
- C. If a thread is blocked in the wait method of an object, and another thread executes the notify method on the same object, then the first thread resumes execution as a direct and sole consequence of the notify call.
- D. If two threads are blocked in the wait method of one object, and another thread executes the notify method on the same object, then the thread that executed the wait call first resumes execution as a direct and sole consequence of the notify call.

Answer: B

10. Click the Exhibit button.

What is the result?

- A. j = 1
- B. j = 10
- C. Compilation fails.
- D. The value of j cannot be determined.

Answer: D

11. Which two are equal? (Choose two.)

- A. 16 > 4
- B. 16 / 2
- C. 16 \* 4
- D. 16 >> 2
- E. 16 / 2^2
- F. 16 >>> 2

Answer: DF

12. Click the Exhibit button.

Thread theThread has just executed line 8 and is in the wait state.

Which statement, if inserted at line 19, causes theThread to leave the wait state and execute line 9?

- A. theThing.notify();
- B. theThread.notify();
- C. theThread.interrupt();
- D. synchronized(theThing) { theThing.notify(); }
- E. synchronized(theThread) { theThread.notify(); }

Answer: D

13. Given:

11. `int index = 1;`

12. `int[] foo = new int[3];`

13. `int bar = foo[index];`

14. `int baz = bar + index;`

15. `System.out.println(" baz = " + baz);`

What is the result?

A. `baz = 0`

B. `baz = 1`

C. `baz = 2`

D. Compilation fails.

E. An exception is thrown at runtime.

Answer: B

14. Click the Exhibit button.

What is the result?

A. `x = 0`

B. `x = 1`

C. `x = 2`

D. `x = 3`

E. `x = 4`

F. Compilation fails.

Answer: D

15. Click the Exhibit button.

What is the result?

A. Compilation fails because of errors at lines 7 and 8.

B. The program prints pairs of values for `x` and `y` that might not always be the same on the same line (for example, "`x = 2, y = 1`").

C. The program prints pairs of values for `x` and `y` that are always the same on the same line (for example, "`x = 1, y = 1`"). In addition, each value appears twice (for example, "`x = 1, y = 1`" followed by "`x = 1, y = 1`").

D. The program prints pairs of values for `x` and `y` that are always the same on the same line (for example, "`x = 1, y = 1`"). In addition, each value appears only once (for example, "`x = 1, y = 1`" followed by "`x = 2, y = 2`").

Answer: B
