

Exam4Test 310-090 Exams

SUN Sun Certified Business Component Developer for J2EE 1.3

Practice Exam: 310-090

Exam Number/Code: 310-090

Exam Name: Sun Certified Business Component Developer for J2EE 1.3

Questions and Answers: 245 Q&As

Exam Description

Order : [310-090 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 310-090 Exam.

Exam4Test **Practice Exams** for 310-090 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **SCBCD** exam and get your **SCBCD Certification**.

We guarantee your success in the first attempt. If you do not pass the **SCBCD** "310-090" (Sun Certified Business Component Developer for J2EE 1.3 on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test SCBCD 310-090 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of SCBCD 310-090 exam provides everything which you need to pass your exam. The SCBCD Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "310-090 exam" question from different websites or books, but logic is the key. Our Product will help you not only pass in the first Sun Certified Business Component Developer for J2EE 1.3(SCBCD) exam try, but also save your valuable time.

Comprehensive questions with complete details about 310-090 exam.

310-090 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real SCBCD exam. 310-090 exam questions updated on regular basis.

Like actual SCBCD Certification exams, 310-090 exam preparation is in multiple-choice questions (MCQs). Tested by many real SCBCD exams before publishing.

Try free SCBCD exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 310-090 Exam: 100% Guarantee to Pass Your 310-090 exam and get your SCBCD Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your SCBCD Certification.

Exam4Test professional provides SCBCD 310-090 the newest Q&A, completely covers 310-090 test original topic.

With our completed SCBCD resources, you will minimize your SCBCD cost and be ready to pass your 310-090 test on Your First Try, 100% Money Back Guarantee included!

310-090 Exam Study Guide

310-090 exam is regarded as one of the most favourite [SCBCD Certifications](#). Many IT professionals prefer to add 310-090 exam among their credentials. Exam4Test not only caters you all the information regarding the 310-090 exam but also provides you the excellent 310-090 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 310-090 exam

310-090 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

310-090 exam questions updated on regular basis

Same type as the certification exams, 310-090 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : SUN 310-090

Title : Sun Certified Business Component Developer for J2EE 1.3

1. What two statements are true about EJB 2.0 container crashes? (Choose two.)

- A. Entities will survive.
- B. An entity bean's primary key will survive.
- C. Message-driven bean instances will survive.
- D. Stateful session bean instances will survive.
- E. Crashes are guaranteed to be transparent to clients using entity beans.

Answer: A B

2. Which is a capability guaranteed by all EJB 2.0 containers?

- A. JTA support
- B. server failover
- C. load balancing
- D. servlet support
- E. server clustering

Answer: A

3. Which exception can be thrown by the findByPrimaryKey method of a remotely called entity bean using container-managed persistence?

- A. javax.ejb.EJBException
- B. javax.ejb.DuplicateKeyException
- C. javax.ejb.NoSuchEntityException
- D. javax.ejb.ObjectNotFoundException

Answer: D

4. Which is a Bean Provider's security-related responsibility?

- A. assigns principals to roles in the application server
- B. declares the role-link element in the deployment descriptor
- C. declares the security-role element in the deployment descriptor
- D. declares the security-role-ref element in the deployment descriptor

Answer: D

5. Which method can be found in BOTH the EJBHome and EJBLocalHome interface?

- A. getHomeHandle()
- B. getEJBMetaData()
- C. remove(Handle handle)
- D. remove(Object primaryKey)

Answer: D

6. Click the Exhibit button.

All beans involved use container-managed transactions and all methods are marked as Required. At runtime, methodB is unable to communicate with its resource and calls the setRollbackOnly method. What is the result?

- A. JMS message redelivery semantics will apply.
- B. The rollback will propagate to the sender of the message.
- C. The bean's onMessage method will reattempt the sequence.
- D. Transactions started by the onMessage method will always commit.

Answer: A

7. Which statement is true about a session bean's lifecycle?

- A. Session beans cannot receive re-entrant loopback calls.
- B. A stateless session bean's home interface can have overloaded create methods.
- C. Stateless session beans can implement javax.ejb.SessionSynchronization.
- D. The EJB 2.0 container can make concurrent calls to any stateful session bean instance.

Answer: A

8. Given:

Which two elements must be included in the <resource-ref> tag? (Choose two.)

- A. <res-type>
- B. <res-ref-name>
- C. <resource-env-ref>
- D. <environment-resource>

Answer: A B

9. Which two APIs are provided to the Bean Provider by an EJB 2.0 container? (Choose two.)

- A. JTA
- B. JMX
- C. JSP
- D. JDO
- E. JAXP

Answer: A E

10. Label the methods according to whether the container ensures that the identity of the associated entity object is available or unavailable to the instance during the method.

Answer:

11. Which transaction attribute may cause a javax.transaction.TransactionRequiredException to be thrown?

- A. Required
- B. Supports
- C. Mandatory
- D. RequiresNew

Answer: C

12. Which two must be in an ejb-jar file, either by inclusion or reference? (Choose two.)

- A. an enterprise archive (.ear) file
- B. a deployment descriptor in the format defined by the EJB 2.0 specification
- C. the class files for the classes that implement the home and remote interfaces
- D. the class files for the interfaces and superinterfaces used by the bean, except J2SE or J2EE interfaces
- E. the class files for the stub classes of the EJBHome andEJBObject interfaces, if remote interfaces are deployed for the bean

Answer: B D

13. Which two are required to properly implement a CMP entity bean class? (Choose two.)

- A. Declare variables for all persistent fields.
- B. Provide constructors to initialize the CMP fields.
- C. Do not implement the ejbFind<METHOD> methods.
- D. Provide implementation code for get and set methods to store and retrieve the persistent fields.
- E. Implement ejbCreate<METHOD> methods for all home interface create<METHOD> methods.

Answer: C E

14. Which accurately describes a characteristic of EJB 2.0?

- A. EJB 2.0 is an example of a web-based component model.
- B. EJB 2.0 components must be directly accessible via HTTP.
- C. EJB 2.0 is an example of a component model for GUI applications.
- D. EJB 2.0 applications can link to legacy systems using a J2EE connector.

Answer: D

15. Which method from javax.ejb.EJBContext returns an object that allows a Bean Provider to demarcate transactions?

- A. begin()
- B. getAutoCommit()
- C. getTransaction()
- D. beginTransaction()
- E. getUserTransaction()

Answer: E

16. Which two are valid types for persistent fields in a CMP 2.0 entity bean? (Choose two.)

- A. Java primitives
- B. entity bean local interfaces
- C. classes implementing java.io.Serializable
- D. either java.util.Collection or java.util.Set

Answer: A C

17. Which two statements about a client's reference to a session bean's remote home interface are true? (Choose two.)

- A. The reference can be passed as a method argument.
- B. The reference provides the client with the IP address of the bean instance.
- C. The reference provides the client with access to at least one create method.
- D. A new home reference must be obtained for each new reference to a remote component interface.

Answer: A C

18. Which is a feature of EJB 2.0?

- A. It provides synchronous message handling through message driven beans.
- B. It provides support for both local and remote client views for session beans.
- C. It provides support for both local and remote client views for message driven beans.

D. It guarantees that all services represented by an object will have conversational state.

Answer: B

19. Which statement about EJB QL is true?

A. An EJB QL query must contain the ORDER BY clause.

B. An EJB QL query is statically defined in the ejb-jar.xml deployment descriptor.

C. Duplicate values are always removed from EJB QL query results by the container.

D. It is legal to use an input parameter in the FROM clause or the SELECT clause of an EJB QL query.

Answer: B

20. Which two are guaranteed to a Bean Provider using an EJB 2.0 container? (Choose two.)

A. access to the JCE API

B. access to JavaMail API

C. access to the JXTA API

D. access to the JAXP API

Answer: B D
