

Exam4Test 310-231 Exams

SUN Sun Certified Developer for Java Web Services 5

Practice Exam: 310-231

Exam Number/Code: 310-231

Exam Name: Sun Certified Developer for Java Web Services 5

Questions and Answers: 91 Q&As

Exam Description

Order : [310-231 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 310-231 Exam.

Exam4Test **Practice Exams** for 310-231 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **SUN Other Certifications** exam and get your *SUN Other Certifications Certification*.

We guarantee your success in the first attempt. If you do not pass the **SUN Other Certifications** "310-231" (Sun Certified Developer for Java Web Services 5 on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test SUN Other Certifications 310-231 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of SUN Other Certifications 310-231 exam provides everything which you need to pass your exam. The SUN Other Certifications Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "310-231 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Sun Certified Developer for Java Web Services 5(SUN Other Certifications) exam try, but also save your valuable time.

Comprehensive questions with complete details about 310-231 exam.

310-231 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real SUN Other Certifications exam. 310-231 exam questions updated on regular basis.

Like actual SUN Other Certifications Certification exams, 310-231 exam preparation is in multiple-choice questions (MCQs). Tested by many real SUN Other Certifications exams before publishing.

Try free SUN Other Certifications exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 310-231 Exam: 100% Guarantee to Pass Your 310-231 exam and get your SUN Other Certifications Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your SUN Other Certifications Certification.

Exam4Test professional provides SUN Other Certifications 310-231 the newest Q&A, completely covers 310-231 test original topic. With our completed SUN Other Certifications resources, you will minimize your SUN Other Certifications cost and be ready to pass your 310-231 test on Your First Try, 100% Money Back Guarantee included!

310-231 Exam Study Guide

310-231 exam is regarded as one of the most favourite [SUN Other Certifications Certifications](#). Many IT professionals prefer to add 310-231 exam among their credentials. Exam4Test not only caters you all the information regarding the 310-231 exam but also provides you the excellent 310-231 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about 310-231 exam

310-231 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

310-231 exam questions updated on regular basis

Same type as the certification exams, 310-231 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 310-231 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : SUN 310-231

Title : Sun Certified Developer for Java Web Services 5

1. The WSIT project implements a number of WS-* specifications to aid developers in creating secure and interoperable services.

What are two parts of the WS-specifications? (Choose two.)

- A. WS-ReliableMessaging
- B. WS-Bootstrapping
- C. WS-Eventing
- D. WS-Policy
- E. WS-WSITrust

Answer: AD

2. `out.println("<p>Exception: " + ex);`

13. `}`

Assume Reliable Messaging is used and the code is correct except for what is missing at line 10.

Which code fragment must be placed at line 10?

- A. Close the port object with `((Closeable)port).close();` after testing result is positive.
- B. Close the port with `port.close();`
- C. Closing the port object is optional, but `port.close();` will work.
- D. Close the port object with `((Closeable)port).close();`

Answer: D

3. A developer is analyzing an existing Web service with performance problems. The analysis reveals the service

employs SOAP over HTTP. When the size of the encoded binary files grew with changing business requirements, the service slowed.

What are two effective solutions for this problem? (Choose two.)

- A. Separating the XML and binary content with WS-Filtering implemented in WSIT will improve efficiency.
- B. XML documents larger than 1 KB with binary encoding should be optimized.
- C. WS-Addressing can ease congestion by routing messages over other protocols.
- D. For existing services, the most effective solution is to increase the available bandwidth.
- E. MTOM can reduce both processing and bandwidth required by SOAP with attachments.

Answer: BE

4. A developer plans to refactor some of the company's existing Java EE 5 business services, moving them out of the existing monolithic application and into Web services.

What are two benefits of exposing existing Java EE 5 functionality as a Web service? (Choose two.)

- A. improved manageability
- B. more finely-grained
- C. enhanced security
- D. loose coupling of functionality
- E. self-describing
- F. automatic session management

Answer: DE

5. Given the Java fragment and schema:

1. `//-- Java code fragment`
2. `public class PurchaseOrder{`
3. `public javax.xml.datatype.XMLGregorianCalendar orderDate;`
4. `}`
5. `//-- Schema fragment`
6. `<xs:complexType name="purchaseOrder">`
7. `<xs:sequence>`
8. `<xs:element name="orderDate" type="xs:anySimpleType"`
9. `minOccurs="0"/>`
10. `</xs:sequence>`
11. `</xs:complexType>`

Which two statements are true about .Net and WCF interoperability for this data? (Choose two.)

- A. The GregorianCalendar maps to an equivalent date type in both Java and .Net.
- B. .Net will generate code with the calendar as a string that functions as well as a date.
- C. .Net will generate code with the calendar as a string that is not type equivalent.
- D. Use of the `@XmlSchemaType` annotation causes .Net to properly map to a date.
- E. Casting in the case of WSIT services is an effective approach for the WCF client.

Answer: CD

6. A team of developers is describing a set of endpoints in their new SOA application.

Given the WSDL extract:

```
<service name="InventoryServices">
  <port name="PurchaseOrder" binding="tns:POBinding">
    <soap:address location="http://192.168.0.2:8080/inventory"/>
  </port>
  <port name="Invoice" binding="tns:InvoiceBinding">
    <soap:address location="http://192.168.0.2:8080/inventory"/>
  </port>
</service>
```

Which statement is true about this WSDL extract?

- A. The extract is WS-I Basic Profile 1.1 compliant because both port element names are different.
- B. The extract is NOT WS-I Basic Profile 1.1 compliant because both port elements point to the same location.

- C. The extract is WS-I Basic Profile 1.1 compliant because both port elements point to different binding elements.
- D. The extract is NOT WS-I Basic Profile 1.1 compliant because it contains two port elements in the same service.
- E. The extract is WS-I Basic Profile 1.1 conformant because both port element names are different.
- F. The extract is WS-I Basic Profile 1.1 conformant because the port, binding, and service element combinations are unique.

Answer: B

7. Which two statements are true about the role of XML schemas in Web services? (Choose two.)

- A. DTDs provide stricter data typing than XML schemas.
- B. XML schemas can be used to validate the organization of XML documents.
- C. XML schemas contain a vocabulary, content model and data types.
- D. DTDs are easier to map to Java than XML schemas, and so remain more popular.
- E. The W3C recommends that XML schemas be referred to as XSD.
- F. The W3C has designated that XML schemas be referred to as WXS.

Answer: BC

8. }

Assume Reliable Messaging is used and the code is correct except for what is missing at line 10.

Which code fragment must be placed at line 10?

- A. Close the port object with ((Closeable)port).close(); after testing result is positive.
- B. Close the port with port.close();
- C. Closing the port object is optional, but port.close(); will work.
- D. Close the port object with ((Closeable)port).close();

Answer: D

9. A team of developers is designing RESTful Web services for a new application.

What are three properties of the services? (Choose three.)

- A. They can be stateful.
- B. They can be stateless.
- C. Components communicate by exchanging representations of the resource.
- D. Components communicate by directly performing operations on the resource.
- E. They require WSDL service API definitions.
- F. Responses can be labeled as cacheable or non-cacheable.

Answer: BCF

10. A student developer has created a new library of math functions to share with friends in a linear algebra class. The developer is having difficulty getting people to come over to the dorm to see the new code library, so he decides to deploy it as a Web service so that everyone can enjoy the features via the Internet. One of the functions has this WSDL definition:

```
<portType name="MyMathLib">
  <operation name="incCtr">
    <input message="tns:incCtr"/>
  </operation>
</portType>
```

Which two statements are true about this Web service? (Choose two.)

- A. This is an asynchronous receive.
- B. This is an asynchronous send.
- C. The client must use SOAPFaultException to display any errors.
- D. It must send a SOAP fault back to the sender.
- E. It must NOT send a SOAP fault back to the sender.

Answer: BE

11. A developer is creating an XML schema using the xsd:all operator.

Given the code:

```

<types>
<schema targetNamespace="http://sun.cert/types"
xmlns:tns="http://sun.cert/types"
xmlns:xsd="http://www.w3.org/2001/XMLSchema">
<xsd:complexType name="Person">
<xsd:all>
<!-- insert code here -->
</xsd:all>
</xsd:complexType>
</schema>
</types>

```

Which two element definitions, when inserted into the given schema fragment, result in a correct schema type definition? (Choose two.)

- A. <xsd:element name="first" type="xsd:string"/>
- B. <xsd:element name="items" type="xsd:long" maxOccurs="5"/>
- C. <xsd:element name="last" type="xsd:string" minOccurs="1" maxOccurs="1"/>
- D. <xsd:element name="first" type="xsd:string" minOccurs="0" maxOccurs="5"/>
- E. <xsd:element name="last" type="xsd:string" minOccurs="1" maxOccurs="5"/>
- F. <xsd:element name="ssn" type="xsd:string" minOccurs="1" maxOccurs="unlimited"/>

Answer: AC

12. Given:

```

1. try { // Call Web service Operation
2. org.me.calculator.client.CalculatorWS port =
3. service.getCalculatorWSPort();
4. // TODO initialize WS operation arguments here
5. int i = 3;
6. int j = 4;
7. // TODO process result here
8. int result = port.add(i, j);
9. out.println("<p>Result: " + result);
10.
11. } catch (Exception ex) {
12. out.println("<p>Exception: " + ex);
13. }

```

Assume Reliable Messaging is used and the code is correct except for what is missing at line 10.

Which code fragment must be placed at line 10?

- A. Close the port object with ((Closeable)port).close(); after testing result is positive.
- B. Close the port with port.close();
- C. Closing the port object is optional, but port.close(); will work.
- D. Close the port object with ((Closeable)port).close();

Answer: D

13. According to the WS-I Basic Profile 1.1, which two statements are true about the targetNamespace attribute for xsd:schema elements that are children of WSDL 1.1 type element? (Choose two.)

- A. Its value must be valid unless it has xsd:import, xsd:annotation, or both as its only child elements.
- B. Its value must be empty unless it has xsd:import, xsd:annotation, or both as its only child elements.
- C. It should have same the value as the namespace attribute on the wsdl:import element in a document being imported.
- D. It must have same the value as the namespace attribute on the wsdl:import element in a document being imported.

Answer: AD

14. A developer must describe a message that contains multiple parts using non-primitive data types.

Which two code fragments produce equivalent composite message structure definitions? (Choose two.)

```

A. <types>
<schema .... >
<complexType name="FOO" type="tns:FOOType"/>
<element name="FOOType">
.
.
.
</element >
<complexType name="BAR" type="tns:BARType"/>
<element name="BARType">
.
.
.
</element >
</schema>
</types>
<message name="FOO">
<part name="FOO" complexType="tns:FOO"/>
<part name="BAR" complexType="tns:BAR"/>
</message>
B. <types>
<schema .... >
<element name="FOO" type="tns:FOOType"/>
<complexType name="FOOType">
.
.
.
</complexType>
<element name="BAR" type="tns:BARType"/>
<complexType name="BARType">
.
.
.
</complexType>
</schema>
</types>
<message name="FOO">
<part name="FOO" element="tns:FOO"/>
<part name="BAR" element="tns:BAR"/>
</message>
C. <types>
<schema .... >
.
.
.
<complexType name="Composite">
<choice>
<element name="FOO" minOccurs="1" maxOccurs="1" type="tns:FOOType"/>
<element name="BAR" minOccurs="0" maxOccurs="unbounded" type="tns:BARType"/>
</choice>
</complexType>
</schema>
</types>

```

```

<message name="FOO">
<part name="composite" type="Composite"/>
</message>
D. <types>
<schema .... >
.
.
.
<complexType name="Composite">
<choice>
<element name="FOO" minOccurs="1" maxOccurs="1" type="tns:FOOType"/>
<element name="BAR" minOccurs="0" maxOccurs="unbounded" type="tns:BARType"/>
</choice>
</complexType>
</schema>
</types>
<message name="FOO">
<part name="composite" type="tns:Composite"/>
</message>

```

Answer: BD

15. A company uses Web services to exchange mortgage and credit data as well as digital versions of associated documents. The data is confidential and it is common for the service and client to exchange applications, credit results, reports and more in a request/response format. Recently, the company has become concerned about the substantial cost of processing and message encryption with a PKI approach.

What can be done to cut costs?

- A. use MTOM to optimize the messages and provide data confidentiality via XML Digital Signature
- B. because of the weak adoption of WS-SecureConversation on Java platforms, consider using Kerberos
- C. use HTTPS as it is both economical and adequate
- D. use WS-SecureConversation and MTOM to reduce the processing overhead

Answer: D
