

## **Exam4Test 642-891 Exams**

### *Cisco Composite Exam*

**Practice Exam:** 642-891

**Exam Number/Code:** 642-891

**Exam Name:** Composite Exam

**Questions and Answers:** 330 Q&As

### **Exam Description**

Order : [642-891 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 642-891 Exam.

Exam4Test **Practice Exams** for 642-891 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **CCNP** exam and get your *CCNP Certification*.

We guarantee your success in the first attempt. If you do not pass the **CCNP** "642-891" (Composite Exam on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test CCNP 642-891 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of CCNP 642-891 exam provides everything which you need to pass your exam. The CCNP Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "642-891 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Composite Exam( CCNP ) exam try, but also save your valuable time.

Comprehensive questions with complete details about 642-891 exam.

642-891 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real CCNP exam. 642-891 exam questions updated on regular basis

Like actual CCNP Certification exams, 642-891 exam preparation is in multiple-choice questions (MCQs). Tested by many real CCNP exams before publishing.

Try free CCNP exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the 642-891 Exam: 100% Guarantee to Pass Your 642-891 exam and get your CCNP Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your CCNP Certification.

Exam4Test professional provides CCNP 642-891 the newest Q&A, completely covers 642-891 test original topic. With our completed CCNP resources, you will minimize your CCNP cost and be ready to pass your 642-891 test on Your First Try, 100% Money Back Guarantee included!

## 642-891 Exam Study Guide

642-891 exam is regarded as one of the most favourite [CCNP Certifications](#). Many IT professionals prefer to add 642-891 exam among their credentials. Exam4Test not only caters you all the information regarding the 642-891 exam but also provides you the excellent 642-891 study guide which makes the certification exam easy for you.

### Exam4Test Engine Features

Comprehensive questions and answers about 642-891 exam

642-891 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

642-891 exam questions updated on regular basis

Same type as the certification exams, 642-891 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 642-891 exam demo before you decide to buy it in Exam4Test.com

### Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 642-891

Title : Composite Exam

1. Which two table types are CEF components?(Choose two.)

- A. forwarding information base
- B. adjacency tables
- C. neighbor tables
- D. caching tables
- E. route tables

Answer: AB

2. When IP multicast is enabled via PIM, which mode uses the flood and prune method?

- A. PIM sparse-dense
- B. Bidir-PIM
- C. PIM-RP
- D. PIM-DM
- E. PIM-SM

Answer: D

3. Refer to the exhibit. An administrator is verifying that a CEF FIB entry exists to destination network 192.168.150.0. Given the output generated by the show ip cef and show adjacency detail commands, which three statements are true? (Choose three.)

- A. There is a valid CEF entry for the destination network 192.168.150.0.
- B. The "valid cached adjacency" entry indicates that CEF will put all packets going to such an adjacency to the next best switching mode.
- C. The counters (0 packets, 0 bytes) indicate a problem with the 192.168.199.3 next hop IP address.
- D. There is an adjacency for the 192.168.199.3 next hop IP address.
- E. The number 003071506800 is the MAC address of the 192.168.199.3 next hop IP address.

F. The number 003071506800 is the MAC address of the source IP address.

Answer: ADE

4. When the BGP path selection process is being performed on a Cisco router, which BGP attribute is used first when determining the best path?

- A. local preference
- B. MED
- C. weight
- D. origin
- E. next-hop
- F. AS-path

Answer: C

5. Which three IP addresses are valid multicast addresses? (Choose three.)

- A. 169.254.23.59
- B. 223.254.255.254
- C. 225.1.1.1
- D. 227.43.34.2
- E. 238.3.3.3
- F. 249.1.2.3

Answer: CDE

6. Refer to the exhibit. What is the effect of the distribute-list command in the R1 configuration?

- A. R1 will filter only the 172.24.1.0/24 route from the R2 RIP updates.
- B. R1 will permit only the 10.0.0.0/24 route in the R2 RIP updates.
- C. R1 will filter the 10.1.0.0/24 and the 172.24.1.0/24 routes from the R2 RIP updates.
- D. R1 will not filter any routes because there is no exact prefix match.

Answer: C

7. Examine the above configuration. What does the route map named test accomplish?

- A. marks all prefixes advertised to the 10.1.1.1 neighbor with a MED of 200
- B. marks all prefixes received from the 10.1.1.1 neighbor with a MED of 200
- C. marks the 10.0.0.0/8 prefix advertised to the 10.1.1.1 neighbor with a MED of 200
- D. marks the 10.0.0.0/8 prefix received from the 10.1.1.1 neighbor with a MED of 200
- E. permits only the 10.0.0.0/8 prefix to be advertised to the 10.1.1.1 neighbor
- F. permits only the 10.0.0.0/8 prefix to be received from the 10.1.1.1 neighbor

Answer: C

8. What can be determined about the HSRP relationship from the displayed debug output?

- A. The preempt feature is not enabled on the 172.16.11.111 router.
- B. The nonpreempt feature is enabled on the 172.16.11.112 router.
- C. Router 172.16.11.111 will be the active router because its HSRP priority is preferred over router 172.16.11.112.
- D. Router 172.16.11.112 will be the active router because its HSRP priority is preferred over router 172.16.11.111.
- E. The IP address 172.16.11.111 is the virtual HSRP router IP address.
- F. The IP address 172.16.11.112 is the virtual HSRP router IP address.

Answer: A

9. Router E is configured with the EIGRP variance 2 command. What path will Router E take to reach Router A?

- A. only E-D-A
- B. only E-B-A
- C. only E-C-A
- D. both E-B-A and E-C-A
- E. both E-B-A and E-D-A
- F. all available paths.

Answer: D

10. Which two methods advertise internal networks to external ISPs via BGP? (Choose two.)

- A. using aggregate routes
- B. disabling synchronization
- C. forcing the next-hop address
- D. defining routes via the network statement

Answer: AD

11. A medium-sized network with a redundant topology that uses core and access switches is experiencing intermittent end-station accessibility. The root bridge is on one of the core switches. It is determined that the problem occurs during STP convergence and that accessibility issues depend on the STP state of the individual switch port. What is the best way to decrease STP convergence time in this situation?

- A. Enable PortFast on the core switches to accelerate the choice of a new root port.
- B. Enable UplinkFast on the VLAN that is having the most accessibility problems.
- C. Enable UplinkFast on the wiring closet switches at the edge of the network.
- D. Enable PortFast on all IOS based switches that have been configured for bridge priority.

Answer: C

12. Refer to the show spanning-tree mst configuration output shown in the exhibit. What should be changed in the configuration of the switch SW\_2 in order for it to participate in the same MST region?

- A. Switch SW\_2 must be configured with a different VLAN range.
- B. Switch SW\_2 must be configured with a different MST name.
- C. Switch SW\_2 must be configured with the revision number of 1.
- D. Switch SW\_2 must be configured with an instance number of 2.

Answer: C

13. Refer to the exhibit. Which two statements are true? (Choose two.)

- A. RTB will receive only the summary address of 2.0.0.0/8.
- B. RTB will receive two routes, the manual summary address of 2.1.0.0/16 and the automatic, summarized classful address of 2.0.0.0/8.
- C. The summary route will be sourced from the RTA s0/0 interface in the RTA routing table.
- D. The summary route will be sourced from the RTA Null0 interface in the RTA routing table.
- E. The summary route will be assigned the administrative distance of 90 in the RTA routing table.
- F. The summary route will be assigned the administrative distance of 5 in the RTB routing table.

Answer: AD

14. Given the above partial configuration, which two statements are true about VLAN traffic? (Choose two.)

- A. VLANs 1-5 will be blocked if fa0/10 goes down.
- B. VLANs 1-5 will use fa0/10 as a backup only.
- C. VLANs 6-10 will use fa0/10 as a backup only.
- D. VLANs 6-10 have a port priority of 128 on fa0/10.
- E. VLANs 1-10 are configured to load share between fa0/10 and fa0/12.

Answer: CE

15. A new workstation has consistently been unable to obtain an IP address from the DHCP server when the workstation boots. Older workstations function normally, and the new workstation obtains an address when manually forced to renew its address. What should be configured on the switch to allow the workstation to obtain an IP address at boot?

- A. UplinkFast on the switch port connected to the server
- B. BackboneFast on the switch port connected to the server
- C. PortFast on the switch port connected to the workstation
- D. trunking on the switch

Answer: C

16. Why should iBGP sessions be fully meshed within a Transit AS?
- A. BGP requires redundant TCP sessions between iBGP peers.
  - B. A full mesh allows for optimal routing within the Transit AS.
  - C. Routes learned via iBGP are never propagated to other eBGP peers.
  - D. Routes learned via iBGP are never propagated to other iBGP peers.
  - E. Routes learned via eBGP are never propagated to other iBGP peers.

Answer: D

17. On a multilayer Catalyst switch, which interface command is used to convert a Layer 3 interface to a Layer 2 interface?

- A. switchport
- B. no switchport
- C. switchport mode access
- D. switchport access vlan vlan-id

Answer: A

18. Given the following configuration on a switch interface, what happens when a host with the MAC address of 0003.0003.0003 is directly connected to the switch port? switchport mode access switchport port-security switchport port-security maximum 2 switchport port-security mac-address 0002.0002.0002 switchport port-security violation shutdown

- A. The port will shut down.
- B. The host will be allowed to connect.
- C. The host will be refused access.
- D. The host can only connect through a hub/switch where 0002.0002.0002 is already connected.

Answer: B

19. Which VTP information does a Catalyst switch advertise on its trunk ports when using VTP? (Choose two.)

- A. VTP mode
- B. STP root status
- C. negotiation status
- D. management domain
- E. configuration revision number

Answer: DE

20. Look at the picture.

The information of the question

1. Seed metric for EIGRP must have the following characteristics:

Bandwidth=512 Kbps

2. Delay=100

3. Reliability=255

4. Load=1

5. MTU=1500

Seed metric for IS-IS must be set to 50.

Only redistribute Level-1 IS-IS routes into EIGRP.

Redistribute EIGRP routes into IS-IS as Level-1 routes.

Correct Answers:

```
Blockade# conf t
```

```
Blockade(config)# router isis
```

```
Blockade(config-router)# redistribute eigrp 100 level-1 metric 50
```

```
Blockade(config)# router eigrp 100
```

```
Blockade(config-router)# redistribute isis level-1 metric 512 10 255 1 1500
```

```
Blockade(config-router)# redistribute connected
```

```
Blockade# copy run start
```

15. Refer to the exhibit. What is the effect of the distribute-list command in the R1 configuration?

- A. R1 will filter only the 172.24.1.0/24 route from the R2 RIP updates.
- B. R1 will permit only the 10.0.0.0/24 route in the R2 RIP updates.
- C. R1 will filter the 10.1.0.0/24 and the 172.24.1.0/24 routes from the R2 RIP updates.
- D. R1 will not filter any routes because there is no exact prefix match.

Answer: C
