Exam : Apple 9L0-402

Title : Mac OS X Support Essentials v10.4 Exam

1. Which statement presents a benefit of protected memory?

- A. Applications that crash automatically save open files.
- B. Data in memory used by running applications is encrypted.
- C. Applications that crash have the data in memory saved to a new file.
- D. Applications that crash do not adversely affect other running applications.

Answer: D

2. What are TWO reasons a system administrator might choose to store user accounts on a directory server? (Choose TWO - partial credit possible.)

- A. So that users can access their FileVault-protected home directories quickly.
- B. So that users can access a variety of services using the same account credentials.
- C. So that the admin user can manage user accounts centrally on the directory server, rather than individually on each client workstation.
- D. So that the admin user can implement Windows-style hashes for SMB/CIFS file sharing; hashes are supported for directory accounts, but not for local accounts.
- E. So that the admin user can use parental controls to manage users; parental controls restrictions can only be implemented on accounts stored on a directory server.

Answer: BC

3. Which statement identifies a potential effect of resetting the master password for a Mac OS X v5 computer?

- A. Users with keychain files created before you changed the master password must use the old master password to unlock their keychains.
- B. Users who enabled FileVault before you changed the master password will not be able to access their home folder if they have forgotten their account password.
- C. Users with keychain files created before you changed the master password will have their keychain passwords

automatically updated to match the new master password.

D. Users whose accounts were created before you changed the master password must use the firmware password to access their home folder if they have forgotten their account password.

Answer: B

4. You have configured your Mac OS X v10.5 computer to share its connected USB printer. Mac OS X users can locate and print to it, but Windows users can not. What additional step must you take to allow Windows users to print to it?

A. In Sharing preferences, enable file sharing over SMB.

B. In Print & Fax preferences, enable the SMB printer driver.

C. In Printer Setup Utility, enable Windows Printing from the Printers menu.

D. In Print & Fax preferences, configure the Windows Printer name and queue.

Answer: A

5. Which of these can you use to determine whether there is network connectivity between your computer and a web server on the Internet?

A. Whois

B. Finger

C. Lookup

D. Traceroute

Answer: D

6. The primary role of the master password in Mac OS X v10.5 is to let you _____.

A. access all the passwords stored in a local keychain

B. reset the password of an account that has FileVault enabled

C. change the startup device by holding down the Option key while the computer starts up

D. connect to any password-protected web server whose password is stored in a local keychain

Answer: B

7. Review the screenshot of the About This Mac window, and then answer the question below.

You want to find the System Software Build number of the copy of Mac OS X v10.5 running on a computer. Where should you click in the About This Mac window, shown above, to find the answer without opening another application?

A. Apple logo icon

B. Mac OS X

C. Version 10.5

D. More Info button

Answer: C

8. Review the screenshot of a Finder window, and then answer the question below.

One of your users needs to maintain the project files whose titles are shown in the screenshot above. If these files will be stored on the startup volume of a Mac OS X v10.5 computer, which format should you use for the volume?

A. MS-DOS (FAT)

B. Unix File System

C. Mac OS Extended (Journaled)

D. Mac OS Extended (Case-Sensitive, Journaled)

Answer: D

9. Review the screenshots of the My Account pane of Accounts preferences, and a Finder window, and then answer the question below.

You manage a Mac OS X v10.5 computer that has three local users configured as shown above. Bill Sykes has lost the password to his account. How can you reset the password?

A. Log in as Bill Sykes using the root password, then reset Bill Sykes password from Accounts preferences.

B. Log in as Samuel Pickwick, then open Reset Password from the Utilities folder, and reset Bill Sykes password.

C. Restart the computer from the Mac OS X Install DVD, then open Reset Password from the Utilities menu, and

reset Bill Sykes password.

D. Log in as Samuel Pickwick, open Directory Access and enable the root user, then authenticate as the root user in Accounts preferences and reset Bill Sykes password.

Answer: C

10. In what order does Mac OS X v10.5 search the folders in the local file system for resources such as fonts?

A. ~/Library, /Library, /System/Library

B. /Library, ~/Library, /System/Library

C. /System/Library, ~/Library, /Library

D. /Library, /System/Library, ~/Library

Answer: A
