EMC Networked Storage - CAS Implementation

Practice Exam: E20-370

Exam Number/Code: E20-370

Exam Name: Networked Storage - CAS Implementation

Questions and Answers: 180 Q&As

Exam Description

Order : [E20-370 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the E20-370 Exam.

Exam4Test **Practice Exams** for E20-370 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **EMC Certification** exam and get your **EMC Certification Certification**.

We guarantee your success in the first attempt. If you do not pass the **EMC Certification** "E20-370" (Networked Storage - CAS Implementation on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test EMC Certification E20-370 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of EMC Certification E20-370 exam provides everything which you need to pass your exam. The EMC Certification Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "E20-370 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Networked Storage - CAS Implementation(EMC Certification) exam try, but also save your valuable time.

Comprehensive questions with complete details about E20-370 exam.

E20-370 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real EMC Certification exam. E20-370 exam questions updated on regular basis.

Like actual EMC Certification Certification exams, E20-370 exam preparation is in multiple-choice questions (MCQs). Tested by many real EMC Certification exams before publishing.

Try free EMC Certification exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the E20-370 Exam: 100% Guarantee to Pass Your E20-370 exam and get your EMC Certification Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your EMC Certification Certification.

original topic. With our completed EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your E20-370 test on Your First Try, 100% Money Back Guarantee included!

E20-370 Exam Study Guide

E20-370 exam is regarded as one of the most favourite [EMC Certification Certifications](#). Many IT professionals prefer to add E20-370 exam among their credentials. Exam4Test not only caters you all the information regarding the E20-370 exam but also provides you the excellent E20-370 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about E20-370 exam

E20-370 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

E20-370 exam questions updated on regular basis

Same type as the certification exams, E20-370 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-370

Title : EMC Networked Storage - NAS Implementation Exam

1. How can an application get authenticated by the Centera?

- A. Application sends the PAI-file encrypted to Centera as part of the connection process
- B. Connect string contains IP-Address of one or more access nodes, and a valid pair of name and secret
- C. Send IP address of all access nodes and correct subnet mask as part of the connect string
- D. System administrator has to set an environment variable, which points to the location of the PAI-module

Answer: B

2. How do you launch the CUA Monitor?

- A. Connect Monitor and keyboard directly to the CUA node and launch web services
- B. Start a http session to the IP-address of the CUA using port 16000
- C. Start a https session to the IP-address of the CUA using port 7227
- D. Starting a SSH session to the IP address of the CUA and use the function "M" in the menu

Answer: C

3. What is the function of garbage collection?

- A. Delete all CDFs with elapsed retention periods
- B. Delete all reflections which do not contain pointers to blobs
- C. Delete blobs that have no associated CDF
- D. Delete virtual pools which do not contain data

Answer: C

4. Which management role is required for the profile to be used by Centera Console?

- A. Accesscontrol role
- B. Audit role
- C. Monitor role
- D. Replication role

Answer: C

5. The customer's Centera is using CentraStar 3.0. A third-party vendor implemented an application and requested that a virtual pool and profile be created on the Centera. The application fails in its attempt to write to the Centera. What is a possible problem?

- A. CE+ is enabled so no data can be written to the Centera
- B. PEA file was never provided to the application
- C. Replication wasn't turned on
- D. Storage pool creation not completed

Answer: B

6. What is an "unbundled" cluster?

- A. Flexible solution where the customer chooses any configuration of hardware or software to deploy
- B. Hardware only solution where the software is provided by the customer
- C. Software only solution where the hardware is provided by the customer
- D. Solution where the customer provides the rack in which the cluster is installed

Answer: D

7. A new customer has been testing their Centera in Governance mode. They have specified retention periods ranging from 0 days to 7 years. They would now like to erase the cluster and put it into production. How can the customer remove the test data from the cluster?

- A. Customer can issue a reset cluster command from the CLI
- B. Customer can switch the cluster off for 24 hours to delete all data
- C. Customer can use the privileged delete command to remove the data
- D. Can not be done, data remains on the cluster

Answer: C

8. What remains after an object is deleted from Centera by an application?

- A. Copy of the CDF
- B. Copy of the object
- C. Nothing will remain
- D. Reflection

Answer: D

9. What are the available Centera replication topologies in addition to Uni-Directional and Bi-Directional?

- A. Chain and Inward Star
- B. Multipoint to Point and Chain
- C. Point to Multipoint and Link
- D. Ring and Star

Answer: A

10. Which item is responsible for granting capabilities?

- A. Access profile
- B. ACL's
- C. CentraStar Mode (Basic, Governance or CE+)
- D. Cluster profile

Answer: B

11. Which naming scheme facilitates single instance storage?

- A. CPM

- B. GM
 - C. M++
 - D. SSPF
- Answer: C

12. What is the primary benefit of the GM naming scheme?

- A. Combination of the MD5 plus SHA-256 hash algorithms
- B. Containerizes small files for increased performance
- C. Faster for both ingest and cluster operations
- D. Single Instance Storage

Answer: C

13. Clips need to be migrated from the default pool to a virtual pool. An access profile has already been created.

Sequence the following steps to migrate clips:

- 1) Grant the profile access to the pool
- 2) Create application virtual pool
- 3) Start migrating poolmappings
- 4) Set the home pool for the access profile
- 5) Create poolmapping

- A. 2, 4, 1, 5, 3
- B. 2, 5, 4, 1, 3
- C. 2, 1, 4, 5, 3
- D. 2, 1, 5, 4, 3

Answer: A

14. What is an example of the command to turn CPP on when the license has been entered?

- A. set content protection parity on
- B. set protection CPP
- C. set protection mode CPP
- D. set protection write parity 250k

Answer: D

15. Click the exhibit button.

Which button, in the diagram, is used to start the CLI from within Centera viewer?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

16. What does SDK Failover enable with the default setting?

- A. If a C-Clip cannot be found on the primary cluster, then the request goes to the secondary cluster
- B. If the communication is interrupted to the primary Centera, all data is rewritten to the secondary Centera
- C. If the pool has reached its defined quota then data is written automatically to the default pool
- D. In case of a disk failure, data is written automatically to a node connected to the other power rail

Answer: A

17. With which enterprise backup solutions does CASbar work?

- A. NDMP compatible systems
- B. NDMP systems with DMA capabilities
- C. Systems capable of mounting a UNIX file system
- D. Systems capable of mounting a windows file system

Answer: D

18. What is the maximum number of nodes in a Gen 4 Centera Cube?

- A. 4
- B. 8
- C. 16
- D. 32

Answer: C

19. Which tool is used to create domains for use with Centera Console?

- A. Centera CLI
- B. Centera Console CLI
- C. Centera Viewer
- D. PDM

Answer: A

20. By default, how many different file sizes does Centera Verify use to perform tests?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: C
