### **EMC EMC Content Management Server Programming(CMSP)**

**Practice Exam:** E20-405

**Exam Number/Code:** E20-405

**Exam Name:** EMC Content Management Server Programming(CMSP)

**Questions and Answers:** 229 Q&As

#### **Exam Description**

Order : [E20-405 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the E20-405 Exam.

Exam4Test **Practice Exams** for E20-405 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **EMC Certification** exam and get your **EMC Certification Certification**.

We guarantee your success in the first attempt. If you do not pass the **EMC Certification** "E20-405" (EMC Content Management Server Programming(CMSP)) on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test EMC Certification E20-405 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of EMC Certification E20-405 exam provides everything which you need to pass your exam. The EMC Certification Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "E20-405 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first EMC Content Management Server Programming(CMSP)( EMC Certification ) exam try, but also save your valuable time.

Comprehensive questions with complete details about E20-405 exam.

E20-405 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real EMC Certification exam. E20-405 exam questions updated on regular basis.

Like actual EMC Certification Certification exams, E20-405 exam preparation is in multiple-choice questions (MCQs). Tested by many real EMC Certification exams before publishing.

Try free EMC Certification exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the E20-405 Exam: 100% Guarantee to Pass Your E20-405 exam and get your EMC Certification Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your EMC Certification Certification.

Exam4Test professional provides EMC Certification E20-405 the newest Q&A, completely covers E20-405 test

original topic. With our completed EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your E20-405 test on Your First Try, 100% Money Back Guarantee included!

## **E20-405 Exam Study Guide**

E20-405 exam is regarded as one of the most favourite [EMC Certification Certifications](#). Many IT professionals prefer to add E20-405 exam among their credentials. Exam4Test not only caters you all the information regarding the E20-405 exam but also provides you the excellent E20-405 study guide which makes the certification exam easy for you.

## **Exam4Test Engine Features**

Comprehensive questions and answers about E20-405 exam

E20-405 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

E20-405 exam questions updated on regular basis

Same type as the certification exams, E20-405 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

## **Exam4Test Help You Pass Any IT Exam**

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-405

Title : EMC Content Management Server Programming(CMSP)

1. Given an SBO called com.mycompany.ICreditScore and the following statement:

```
newModule(repositoryName, "com.mycompany.ICreditScore", sessionMgr)
```

What does the statement do?

- A. deploys com.mycompany.ICreditScore module
- B. deploys com.mycompany.ICreditScore service
- C. deploys and instantiates com.mycompany.ICreditScore module
- D. deploys and instantiates com.mycompany.ICreditScore service

Answer: C

2. Given the following architecture:

To disable full-text search for end users of Webtop, on which computer should you update the dfc.properties file?

- A. server1 only
- B. app1 only
- C. both server1 and local1
- D. both app1 and local1

Answer: B

3. A TBO has been created for the custom object type called my\_loan\_application. If the following statement is executed in a Webtop custom component, where is the TBO executed?

```
IDfSysObject loanApp = (IDfSysObject)session.newObject("my_loan_application");
```

- A. The TBO executes on the client browser's JVM.
- B. The TBO executes on the Global Registry computer.

- C. The TBO executes on the application server JVM.
- D. The TBO executes on the Content Server JVM.

Answer: C

4. Which DFC interface provides a `getCheckoutDirectory()` method that returns the local checkout directory?

- A. `IDfClient`
- B. `IDfClientX`
- C. `IDfSession`
- D. `IDfClientRegistry`

Answer: D

5. What kind of module is used to create a Documentum Web Service?

- A. Type-based Business Object
- B. Service-based Business Object
- C. Web-based Business Object
- D. Custom Module

Answer: B

6. When are the binding rules for a virtual document actually applied?

- A. When the virtual document is saved
- B. When `IDfSysObject.asVirtualDocument()` is called
- C. When `IDfVirtualDocumentNode.getChildCount()` is called
- D. When `IDfVirtualDocument.getRootNode()` is called

Answer: C

7. How should you deploy a TBO to the repository?

- A. Using `IDfClient.newModule()` only
- B. Using Documentum Application Installer only
- C. Using both Documentum Application Installer and `IDfClient.newModule()`
- D. Using Documentum Application Installer, `IDfClient.newModule()` and `IDfClient.newService()`

Answer: B

8. Which SBO method signature is valid for conversion to a web service?

- A. `void setKeyword(IDfSysObject obj, int index, String value)`
- B. `boolean uploadConfiguration(java.io.File myFile)`
- C. `boolean setKeyword(IDfSysObject obj, int index, String value)`
- D. `int countDocuments(IDfSession sess, String qualification)`

Answer: B

9. Which statement is true?

- A. `IDfSession.getLoginTicket()` will return a ticket from the current session.
- B. `IDfSession.getLoginTicket()` will return a new session object for the current user.
- C. `IDfSession.getLoginTicket()` will return a new session object for the super user.
- D. `IDfSession.getLoginTicket()` will return a ticket from a new session.

Answer: A

10. A TBO has been created for a custom object type called `my_loan_application`. The TBO relies on a dependant SBO to calculate credit scores. The TBO is only invoked by the Webtop application.

Where does the SBO execute?

- A. Global registry machine
- B. Content Server JVM
- C. Application Server JVM
- D. the client browser's JVM

Answer: C

11. add the dfc.bof.registry entries to the dfc.properties file.

Answer: C

12. What are the minimum required components to extend custom object type behavior?

- A. TBO and SBO
- B. TBO and DFC
- C. SBO and DFC
- D. SBO and Web Services Framework

Answer: B

13. Where are the credentials located for the BOF's client dynamic delivery mechanism?

- A. dfc.properties
- B. dmcl.ini
- C. bof.properties
- D. dbor.properties

Answer: A

14. Which statement is true about the object model?

- A. dmr\_content is not a sub-type of dm\_sysobject although sysobject contents are stored as dmr\_content objects.
- B. dm\_acl objects are stored in the System cabinet.
- C. Not all sysobjects can have associated permissions.
- D. Virtual documents are objects of type dm\_relation that describe a parent/child relationship between objects.

Answer: A

15. encrypt the password

4. add the dfc.bof.registry entries to the dfc.properties file.

Answer: C

16. Which statement is true about Trusted Content Services (TCS)?

- A. TCS is not required to create ApplicationPermission entries.
- B. TCS is not required to evaluate ApplicationPermission entries.
- C. TCS is not required to delete ApplicationPermission entries.
- D. TCS validates and enforces application permissions at the server level.

Answer: B

17. Which code should you use to create a copy of the current object and place it in CopyCab?

- A. `IDfSysObject sysObj = (IDfSysObject)session.getObject(myId);  
sysObj.link("/CopyCab");  
sysObj.savelock();`
- B. `IDfSysObject sysObj = (IDfSysObject)session.getObject(myId);  
sysObj.unlink("/SourceCab");  
sysObj.link("/CopyCab");  
sysObj.saveAsNew( false );`
- C. `IDfSysObject sysObj = (IDfSysObject)session.newObject(myId);  
sysObj.link("/CopyCab");  
sysObj.save();`
- D. `IDfSysObject sysObj = (IDfSysObject)session.getObject(myId);  
sysObj.unlink("/SourceCab");  
sysObj.link("/CopyCab");  
sysObj.save();`

Answer: B

18. What happens when you fail to close open query collections in a DFC application?

- A. Performance for other users will be impaired.
- B. Eventually, no more queries can be executed.
- C. Garbage collection will release appropriate resources.
- D. The session will disconnect.

Answer: B

19. How do you manually configure the DFC global registry?

- A. 1. add the dfc.bof.registry entries to the dfc.properties file.
- B. 1. encrypt the password
  - 2. add the dfc.bof.registry entries to the dfc.properties file.
- C. 1. activate the registry user
  - 2. change the password
  - 3. encrypt the password
  - 4. add the dfc.bof.registry entries to the dfc.properties file.
- D. 1. create a new user as a consumer
  - 2. designate the user as a registry user
  - 3. encrypt the password
  - 4. add the dfc.bof.registry entries to the dfc.properties file.

Answer: C

20. Given the following repositories that are projecting to the following Connection Brokers:

How do you dynamically add host2 as additional Connection Broker, such that Docbase A and Docbase B are listed as available repositories?

- A. change "host = host1" to "host = host1, host2" in dmcl.ini
- B. execute `IdfDocbrokerClient.addDocbroker("host2",1489);`
- C. add the following statements in the dmcl.ini: `[DOCBROKER_BACKUP_1] host=host2 port=1489`
- D. add the following statements in the dmcl.ini: `[DOCBROKER_SECONDARY] host=host2 port=1489`

Answer: B
