

Exam4Test E20-590 Exams

EMC Backup and Recovery Specialist Exam

Practice Exam: E20-590

Exam Number/Code: E20-590

Exam Name: Backup and Recovery Specialist Exam

Questions and Answers: 123 Q&As

Exam Description

Order : [E20-590 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the E20-590 Exam.

Exam4Test **Practice Exams** for E20-590 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **EMC Certification** exam and get your **EMC Certification Certification**.

We guarantee your success in the first attempt. If you do not pass the **EMC Certification** "E20-590" (Backup and Recovery Specialist Exam on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test EMC Certification E20-590 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of EMC Certification E20-590 exam provides everything which you need to pass your exam. The EMC Certification Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "E20-590 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Backup and Recovery Specialist Exam(EMC Certification) exam try, but also save your valuable time.

Comprehensive questions with complete details about E20-590 exam.

E20-590 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real EMC Certification exam. E20-590 exam questions updated on regular basis.

Like actual EMC Certification Certification exams, E20-590 exam preparation is in multiple-choice questions (MCQs). Tested by many real EMC Certification exams before publishing.

Try free EMC Certification exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the E20-590 Exam: 100% Guarantee to Pass Your E20-590 exam and get your EMC Certification Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your EMC Certification Certification.

Exam4Test professional provides EMC Certification E20-590 the newest Q&A, completely covers E20-590 test

original topic. With our completed EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your E20-590 test on Your First Try, 100% Money Back Guarantee included!

E20-590 Exam Study Guide

E20-590 exam is regarded as one of the most favourite [EMC Certification Certifications](#). Many IT professionals prefer to add E20-590 exam among their credentials. Exam4Test not only caters you all the information regarding the E20-590 exam but also provides you the excellent E20-590 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about E20-590 exam

E20-590 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

E20-590 exam questions updated on regular basis

Same type as the certification exams, E20-590 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free E20-590 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-590

Title : Backup and Recovery Specialist Exam

1. A customer has a DL4100. What is required to activate the embedded storage node?

A.Add the embedded storage node license through the EMC Disk Library GUI

B.Log in to the disk library and install the EMC NetWorker storage node

C.Log in to the disk library and run the enable_esn.sh script

D.Use the command line interface to enable the embedded storage node option

Answer: A

2. A customer needs to configure a backup solution using EMC NetWorker with a SCSI jukebox directly attached to the EMC NetWorker server. There are two storage nodes dynamically sharing a second jukebox with four tape drives. Which EMC NetWorker licenses are required?

A.1 EMC NetWorker Network edition, 1 Storage Node, and 4 Dynamic Drive Sharing

B.1 EMC NetWorker Network edition, 2 Storage Nodes, 4 Dynamic Drive Sharing, and 2 Autochangers

C.1 EMC NetWorker Power edition, 2 Storage Nodes, 4 Dynamic Drive Sharing, and 1 Autochanger

D.1 EMC NetWorker Power edition, 2 Storage Nodes, and 4 Dynamic Drive Sharing

Answer: B

3. A customer wants to expand an existing Symmetrix DMX-3 production system for use with backup-to-disk. What do you recommend?

A.Add ATA disks

B.Dedicate a quadrant to backup

C.Use Fibre Channel disks only

D.Use RAID 3 with the backup LUNs

Answer: B

4. Which performs the de-duplication process in a DL3D 1500 backup environment?

- A.Back end CLARiiON
- B.Backup Client
- C.Engine
- D.Storage Node

Answer: C

5. An EMC NetWorker customer wants to clone save sets from an EMC Disk Library (EDL) to a physical tape library with the ability to track all tapes in EMC NetWorker.

Which solution will accomplish this while minimizing SAN usage?

- A.Attach the physical library to the EDL and let it handle the operation
- B.Configure an existing storage node to perform the operation
- C.Configure the EDL with the embedded storage node
- D.Install a second storage node in the environment dedicated to cloning

Answer: C

6. You designed a customer solution using a disk device for backups. The available disk space is limited. You determined that it is necessary to move data from disk to tape after a specified time.

What should you use?

- A.Advanced file type device with cloning
- B.Advanced file type device with staging
- C.File type device and nsrcompress
- D.File type device with archiving

Answer: B

7. You are designing a backup solution for an EMC NetWorker customer who wants to backup while restoring from the same device. Which option should be used?

- A.Advanced file type device
- B.File type device
- C.Save set cloning
- D.Save set staging

Answer: A

8. Why are split-mirror snapshots preferred for recovery from LUN failure?

- A.Always synchronized
- B.Faster recovery compared to Copy on Write snapshots
- C.Provides a complete copy of production data
- D.Requires less storage space compared to Copy on Write snapshots

Answer: C

9. You are designing a backup and recovery solution using EMC NetWorker and are considering automatic cloning. What is a concern while using this feature?

- A.Additional volumes must be allocated to the default clone pool
- B.Cloning operations may interfere with backup operations
- C.NetWorker client performance may be degraded while cloning is being performed
- D.Server parallelism may need to be increased to allow for the cloning operations

Answer: B

10. A customer needs to configure backup for a large database (~ 1 TB) with EMC NetWorker Module for Oracle. Which solution will minimize performance degradation on the database server?

- A.Backup-to-tape
- B.Backup-to-disk

- C.Backup-to-virtual tape library
- D.Backup with split-mirror function

Answer: D

11. In an EMC Disk Library (EDL) environment, what describes the auto-archive feature?

- A.Backup application issues clone command; EDL copies save sets to physical tape with a different barcode
- B.Backup application issues clone command; EDL copies save sets to physical tape with the same barcode
- C.Backup application issues eject command; EDL moves backup data to physical tape with a different barcode
- D.Backup application issues eject command; EDL moves backup data to physical tape with the same barcode

Answer: D

12. A customer has the following backup requirements:

Must meet short backup window

Must meet low RTO

Must backup many highly transactional Oracle databases

Must eliminate tape

The customer has two data center sites with ample bandwidth between them but needs to limit utilization as much as possible. Which solution best addresses the customer's requirements?

- A.A pair of EMC DL3D 3000 at two different sites with replication implemented between them
- B.A pair of EMC DL4000 series at two different sites with replication implemented between them
- C.A pair of EMC DL4000 series with 3D4000 at two different sites with replication implemented between them
- D.A pair of EMC DL4000 series with 3D4000 at two different sites with MirrorView implemented between them

Answer: C

13. An EMC NetWorker customer has a retention policy of 2 years and a browse policy of 6 months for a client. They would like to retain the indexes for all new backups for this client for an additional 30 days.

How would this be accomplished?

- A.Add 30 days to the client's browse policy
- B.Add 30 days to the client's retention policy
- C.Add 30 days to the client's retention time
- D.Add 30 days to the server's retention time

Answer: A

14. You designed a customer solution using a disk device for backups. The available disk space is limited. You determined that it is necessary to move data from disk to tape after a specified time.

What should you use?

- A.Advanced file type device with cloning
- B.Advanced file type device with staging
- C.File type device and nsrcompress
- D.File type device with archiving

Answer: B

15. What is an advantage of implementing Celerra LAN backup-to-disk?

- A.Better compression and encryption algorithms
- B.Improves restore performance due to the RAID 1/0 protection schema of the target volumes
- C.Minimizes storage administration by automatic creation of optimal target file systems
- D.Provides a dedicated target array without the impact of other application data storage

Answer: C

16. An EMC NetWorker customer installed a NAS system in their environment and wants to use it as a backup-to-disk destination device via CIFS. Which device type should be used?

- A.Advanced File
- B.Celerra File System
- C.File

D.NDMP

Answer: D

17. A customer has a DMX-3 system with available low cost Fiber Channel storage and wants to use it as a backup-to-disk destination storage device. Some of the storage nodes in the network are not connected to the SAN. Which solution can be used so that all storage nodes in the environment use the DMX-3 as the backup-to-disk destination device while leveraging their current investment?

A.CX80G

B.DL210

C.NS80

D.NS80G

Answer: D

18. A customer wants to clone individual save sets as soon as each completes. Which device do you recommend for the backup target?

A.Disk

B.Tape

C.Virtual tape

D.WORM

Answer: A

19. A customer is concerned about non-intentional SCSI resets destroying backups in their EMC NetWorker environment. Which EMC NetWorker feature should be configured?

A.Auto Media Verify

B.Eject Sleep

C.Idle Device Timeout

D.Port Polling Period

Answer: A

20. What is the advantage of using N_Port ID Virtualization (NPIV)?

A.Allows DL4000 with Active Engine Failover to be connected to FC-AL environments

B.Allows DL4000 with Active Engine Failover to be connected to FC-SW environments

C.Provides link aggregation capability in DL3D 1500 systems

D.Provides multi-port replication capability in DL3D 1500 systems

Answer: B
