

## **Exam4Test F50-521 Exams**

### **F5 Networks F5 BIG-IP V9.4 LTM Essentials**

**Practice Exam:** F50-521

**Exam Number/Code:** F50-521

**Exam Name:** F5 BIG-IP V9.4 LTM Essentials

**Questions and Answers:** 100 Q&As

#### **Exam Description**

Order : [F50-521 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the F50-521 Exam.

Exam4Test **Practice Exams** for F50-521 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **F5 Networks** exam and get your *F5 Networks Certification*.

We guarantee your success in the first attempt. If you do not pass the **F5 Networks** "F50-521" (F5 BIG-IP V9.4 LTM Essentials) on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test F5 Networks F50-521 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of F5 Networks F50-521 exam provides everything which you need to pass your exam. The F5 Networks Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "F50-521 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first F5 BIG-IP V9.4 LTM Essentials( F5 Networks ) exam try, but also save your valuable time.

Comprehensive questions with complete details about F50-521 exam.

F50-521 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real F5 Networks exam. F50-521 exam questions updated on regular basis.

Like actual F5 Networks Certification exams, F50-521 exam preparation is in multiple-choice questions (MCQs).

Tested by many real F5 Networks exams before publishing.

Try free F5 Networks exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the F50-521 Exam: 100% Guarantee to Pass Your F50-521 exam and get your F5 Networks Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your F5 Networks Certification.

Exam4Test professional provides F5 Networks F50-521 the newest Q&A, completely covers F50-521 test original topic. With our completed F5 Networks resources, you will minimize your F5 Networks cost and be ready to pass

your F50-521 test on Your First Try, 100% Money Back Guarantee included!

## **F50-521 Exam Study Guide**

F50-521 exam is regarded as one of the most favourite [F5 Networks Certifications](#). Many IT professionals prefer to add F50-521 exam among their credentials. Exam4Test not only caters you all the information regarding the F50-521 exam but also provides you the excellent F50-521 study guide which makes the certification exam easy for you.

### **Exam4Test Engine Features**

Comprehensive questions and answers about F50-521 exam

F50-521 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

F50-521 exam questions updated on regular basis

Same type as the certification exams, F50-521 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free F50-521 exam demo before you decide to buy it in Exam4Test.com

### **Exam4Test Help You Pass Any IT Exam**

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : F5-Networks F50-521

Title : F5 BIG-IP V9.4 LTM Essentials

1. The incoming client's IP address is 205.12.45.52. The last five connections have been sent to members C,D,A,B,B.

Given the virtual server and pool definitions and the statistics shown in the exhibit, which member will be used for the next connection?

- A. 10.10.20.1:80
- B. 10.10.20.2:80
- C. 10.10.20.3:80
- D. 10.10.20.4:80
- E. 10.10.20.5:80

Answer: D

2. Where is the load-balancing mode specified?

- A. within the pool definition
- B. within the node definition
- C. within the virtual server definition
- D. within the pool member definition

Answer: A

3. When upgrading a BIG-IP redundant pair, what happens when one system has been updated but the other has not

- A. Syncing should not be performed.
- B. The first system to be updated will assume the Active role.
- C. This is not possible since both systems are updated simultaneously.
- D. The older system will issue SNMP traps indicating a communication error with the partner.

Answer: A

4. Assume a virtual server has a ServerSSL profile. What SSL certificates are required on the BIG-IP?

- A. No SSL certificates are required on the BIG-IP.
- B. The BIG-IP's SSL certificates must only exist.
- C. The BIG-IP's SSL certificates must be issued from a certificate authority.
- D. The BIG-IP's SSL certificates must be created within the company hosting the BIG-IPs.

Answer: A

5. Assume a BIG-IP has no NATs or SNATs configured. Which two scenarios are possible when client traffic arrives on a BIG-IP that is NOT destined to a self-IP? (Choose two.)

- A. If the destination of the traffic does not match a virtual server, the traffic will be discarded.
- B. If the destination of the traffic does not match a virtual server, the traffic will be forwarded based on routing tables.
- C. If the destination of the traffic matches a virtual server, the traffic will be processed per the virtual servers definition.
- D. If the destination of the traffic matches a virtual server, the traffic will be forwarded, but it cannot be load-balanced since no SNAT has been configured.

Answer: AC

6. Which statement is true concerning SSL termination?

- A. A virtual server that has both ClientSSL and ServerSSL profiles can still support cookie persistence.
- B. Decrypting traffic at the BIG-IP allows the use of iRules for traffic management, but increases the load on the pool member.
- C. When any virtual server uses a ClientSSL profile, all SSL traffic sent to the BIG-IP is decrypted before it is forwarded to servers.
- D. If a virtual server has both a ClientSSL and ServerSSL profile, the pool members have less SSL processing than if the virtual server had only a ClientSSL profile

Answer: A

7. If a client's browser does not accept cookies, what occurs when the client connects to a virtual server using cookie persistence?

- A. The connection request is not processed.
- B. The connection request is sent to an apology server.
- C. The connection request is load-balanced to an available pool member.
- D. The connection request is refused and the client is sent a "server not available" message.

Answer: C

8. Assume a client's traffic is being processed only by a NAT; no SNAT or virtual server processing takes place. Also assume that the NAT definition specifies a NAT address and an origin address while all other settings are left at their defaults. If a client were to initiate traffic to the NAT address, what changes, if any, would take place when the BIG-IP processes such packets?

- A. The source address would not change, but the destination address would be translated to the origin address.
- B. The destination address would not change, but the source address would be translated to the origin address.
- C. The source address would not change, but the destination address would be translated to the NAT's address.
- D. The destination address would not change, but the source address would be translated to the NAT's address.

Answer: A

9. Assuming other fail-over settings are at their default state, what would occur if the fail-over cable were to be disconnected for five seconds and then reconnected?

- A. As long as network communication is not lost, no change will occur.
- B. Nothing. Fail-over due to loss of voltage will not occur if the voltage is lost for less than ten seconds.
- C. When the cable is disconnected, both systems will become active. When the voltage is restored, unit two will revert to standby mode.
- D. When the cable is disconnected, both systems will become active. When the voltage is restored, both systems will maintain active mode.

Answer: C

10. You have created a custom profile named TEST2. The parent profile of TEST2 is named TEST1. If additional changes are made to TEST1, what is the effect on TEST2?

- A. All changes to TEST1 are propagated to TEST2.
- B. Some of the changes to TEST1 may propagate to TEST2.
- C. Changes to TEST1 cannot affect TEST2 once TEST2 is saved.
- D. When TEST1 is changed, the administrator is prompted and can choose whether to propagate changes to TEST2.

Answer: B
