

Exam4Test HP0-661 Exams

HP NonStop Systems and Technologies

Practice Exam: HP0-661

Exam Number/Code: HP0-661

Exam Name: NonStop Systems and Technologies

Questions and Answers: 120 Q&As

Exam Description

Order : [HP0-661 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-661 Exam.

Exam4Test **Practice Exams** for HP0-661 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **Certification II** exam and get your *Certification II Certification*.

We guarantee your success in the first attempt. If you do not pass the **Certification II** "HP0-661" (NonStop Systems and Technologies) on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test Certification II HP0-661 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of Certification II HP0-661 exam provides everything which you need to pass your exam. The Certification II Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "HP0-661 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first NonStop Systems and Technologies(Certification II) exam try, but also save your valuable time.

Comprehensive questions with complete details about HP0-661 exam.

HP0-661 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real Certification II exam. HP0-661 exam questions updated on regular basis.

Like actual Certification II Certification exams, HP0-661 exam preparation is in multiple-choice questions (MCQs). Tested by many real Certification II exams before publishing.

Try free Certification II exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the HP0-661 Exam: 100% Guarantee to Pass Your HP0-661 exam and get your Certification II Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your Certification II Certification.

Exam4Test professional provides Certification II HP0-661 the newest Q&A, completely covers HP0-661 test original topic. With our completed Certification II resources, you will minimize your Certification II cost and be ready to pass

your HP0-661 test on Your First Try, 100% Money Back Guarantee included!

HP0-661 Exam Study Guide

HP0-661 exam is regarded as one of the most favourite [Certification II Certifications](#). Many IT professionals prefer to add HP0-661 exam among their credentials. Exam4Test not only caters you all the information regarding the HP0-661 exam but also provides you the excellent HP0-661 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about HP0-661 exam

HP0-661 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-661 exam questions updated on regular basis

Same type as the certification exams, HP0-661 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-661 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-661

Title : NonStop Systems and Technologies

1. What is the primary function of the Expand subsystem?

- A. transfers data between geographically dispersed NonStop systems
- B. allows a single node to grow beyond 16 processors
- C. connects multiple NonStop systems together to form one network
- D. connects NonStop systems to systems manufactured by other vendors

Answer: C

2. Which software is required to implement RDF?

- A. TCP/IP
- B. NonStop TMF
- C. NonStop TS/MP
- D. RSC

Answer: B

3. An enterprise management tool is typically used to operate and manage _____.

- A. computer systems from different vendors
- B. similar computer systems spread throughout a large enterprise
- C. distributed database systems on large networks
- D. multiple databases on a single system

Answer: A

4. Two processors within a single enclosure connect to each other through which component?

- A. SEBs
- B. PMCU

- C. backplane
- D. IOMFs

Answer: C

5. A business transaction consists of _____.

- A. all steps necessary to transform a database from one consistent state to another
- B. all steps necessary to transform a data file from one consistent state to another
- C. all steps necessary to transform a local database from one consistent state to another
- D. an individual record update on a local or remote data file

Answer: A

6. Group numbers are important because they _____.

- A. correspond to the processor numbers housed within the group
- B. identify the system enclosure in which a system component is located
- C. provide the ability to easily switch disk drives from group to group
- D. determine the order in which I/O enclosures are added to the system

Answer: B

7. Which peripherals can you connect to a NonStop S-series server via AWAN?

- A. ATM devices
- B. standard serial printers
- C. tape drives
- D. X.25 connected devices

Answer: B

8. Which advantage does the NonStop S-series RISC processor provide over CISC processors in earlier systems?

- A. customized, special purpose instructions
- B. numerous addressing modes
- C. optimized instruction pipelines
- D. multicycle machine instructions

Answer: C

9. Which statement best describes disk cache blocks?

- A. Entry sequenced index blocks are always kept in cache.
- B. Different disk cache block sizes exist to assist in performance tuning.
- C. Different file types require different disk cache block sizes.
- D. Changes to disk cache block values take effect after the next system cold load.

Answer: B

10. TSM workstations can be connected to either a public LAN or a dedicated TSM LAN. Which functions are available to TSM when installed for use on the Public LAN? Select TWO.

- A. low level link
- B. service application
- C. EMS event viewer
- D. system start
- E. notification director

Answer: BC

11. What are advantages of a message-based operating system architecture? Select TWO.

- A. It supports system and peripheral expansion to match business growth.
- B. All messages are shared between processes using shared-memory buffers.
- C. Programmers can select different memory buffer sizes based on message priority.
- D. Applications do not need to be modified when adding new hardware or processes since the operating system

translates device and process names into their physical locations.

E. Additional networking software is not needed to extend the capability of the message-based operating system to a network of NonStop systems.

Answer: AD

12. Which term identifies a collection of routers and ServerNet links?

- A. adapter
- B. fabric
- C. SAC
- D. LIF

Answer: B

13. Which component does NOT contain at least one ServerNet Addressable Controller?

- A. IOMF CRU
- B. SWAN concentrator
- C. E4SA
- D. PMF CRU

Answer: B

14. A ServerNet buffer board is a part of _____.

- A. an IOMF CRU
- B. a PMF CRU
- C. a SWAN concentrator
- D. a PMCU

Answer: A

15. In accessing a local process, users and user programs need only provide the name of the process. Why?

- A. The file system translates the process name to a physical location using internal tables.
- B. All processes on the system keep tables that contain the names of all other processes on the system.
- C. A process in a processor can only communicate with other processes in the same processor.
- D. Processes do not communicate by name as they need to know the location of the process they are trying to access.

Answer: A

16. Why does disk I/O throughput improve as systems are expanded?

- A. Disk process checkpointing is reduced.
- B. More logical volumes are available for use.
- C. Larger NonStop TMF audit trails are possible.
- D. The newly added disks are faster.

Answer: B

17. A service processor _____. Select TWO.

- A. has interfaces to both the ServerNet hardware and the serial maintenance bus (SMB)
- B. runs its own independent operating system
- C. connects directly to system fans
- D. routes Guardian interprocess communications
- E. manages communications only to the processor within its enclosure

Answer: AB

18. What is a mandatory requirement for installing a single-enclosure NonStop S74000 server?

- A. raised floor
- B. ventilated room
- C. air conditioning
- D. 240V power

Answer: B

19. ServerNet routing tables are generated based on the _____? Select TWO.

- A. SCF configured settings in the \$ZZKRN subsystem
- B. settings in the group ID switches
- C. number of routers between nodes
- D. manner in which the SEB cables are routed
- E. ServerNet topology configuration setting for the group

Answer: BE

20. Power to the NonStop S-series enclosures is set to the proper voltage by _____.

- A. configuring the power switch on the PMCU
- B. auto-ranging circuitry within the power supply
- C. ordering the proper part number for the voltage required
- D. ordering the power adapter appropriate to the voltage supplied

Answer: B
