

Exam : [**HP HP0-714**](#)

Title : **HP OpenView Storage Area
Manager**

Version : **Demo**

1. For which two environments is HP OpenView Storage Allocator optimally suited? (Choose two.)

- A. when Access Control is required for JBOD or tape
- B. when there is a single, direct attached, large storage array
- C. when there are a large number of heterogeneous storage arrays
- D. when there are a large number of Network Attached Storage (NAS) devices

Answer: AC

2. Which command on an HP OpenView Storage Area Manager UNIX Host Agent is used to stop the Host Agent process?

- A. /stop_HA
- B. /HA_trigger stop
- C. /dial_trigger dtop
- D. /HostAgent_Stop

Answer: B

3. If Host Agent deployment fails, which log is useful in determining the cause?

- A. sanhost.log
- B. deployha.log
- C. HA_deploy.log
- D. <hostname>.log

Answer: D

4. Running support.cmd creates which file?

- A. path.xml
- B. support.txt
- C. support.zip
- D. support_data

Answer: C

5. SAMTools is _____.

- A. available as a separate CD
- B. downloadable from the support server
- C. distributed as a part of the product CD
- D. loaded on installation of HP OpenView Storage Area Manager

Answer: C

6. If a log file begins with _____, then it logs information for HP Storage Area Manager Jcore services

- A. JC
- B. CP
- C. CS
- D. PM
- E. DM

Answer: C

7. What information can be gathered using the Support.cmd command? (Choose four.)

- A. managementserver\lib directory
- B. managementserver\logs directory
- C. managementserver\data directory
- D. managementserver\solid (log files)
- E. managementserver\config directory
- F. managementserver\support directory

Answer: CDEF

8. A storage Area manager implementer is about to check for any new or updated Device Plug-ins (DPIs) on the OpenView website.

Which two sections of the SAN Verification worksheet would the implementer use to determine which DPLs should be downloaded for this installation? (Choose two.)

- A. Network
- B. OV SAM Hosts

- C. Fabric Devices
- D. Other Software
- E. Attached Storage
- F. Hosts and Servers

Answer: CE

9. Which implementation phase involves setting the storage domain name, setting the device discovery range, and setting the currency type?

- A. preparing for installation
- B. verifying the SAN Environment
- C. installing HP OpenView Storage Area manager
- D. setting up and configuring HP Open View Storage Area manager

Answer: C

10. The HP OpenView Storage Area Manager Verification Worksheet asks for HBA Driver information in order to verify _____.(Choose two.)

- A. support for SNIA libraries
- B. support for Device Plug-ins (Dpls)
- C. compatibility with interconnect devices
- D. compatibility with Storage Allocator's filter driver

Answer: AD
