

## **Exam4Test HP0-J29 Exams**

### **HP Replication Solutions for the HP StorageWorks EVA**

**Practice Exam:** HP0-J29

**Exam Number/Code:** HP0-J29

**Exam Name:** Replication Solutions for the HP StorageWorks EVA

**Questions and Answers:** 70 Q&As

#### **Exam Description**

Order : [HP0-J29 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-J29 Exam.

Exam4Test **Practice Exams** for HP0-J29 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **Certification I** exam and get your *Certification I Certification*.

We guarantee your success in the first attempt. If you do not pass the **Certification I** "HP0-J29" (Replication Solutions for the HP StorageWorks EVA on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test Certification I HP0-J29 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of Certification I HP0-J29 exam provides everything which you need to pass your exam. The Certification I Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "HP0-J29 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Replication Solutions for the HP StorageWorks EVA( Certification I ) exam try, but also save your valuable time.

Comprehensive questions with complete details about HP0-J29 exam.

HP0-J29 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real Certification I exam. HP0-J29 exam questions updated on regular basis.

Like actual Certification I Certification exams, HP0-J29 exam preparation is in multiple-choice questions (MCQs).

Tested by many real Certification I exams before publishing.

Try free Certification I exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the HP0-J29 Exam: 100% Guarantee to Pass Your HP0-J29 exam and get your Certification I Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your Certification I Certification.

Exam4Test professional provides Certification I HP0-J29 the newest Q&A, completely covers HP0-J29 test original topic. With our completed Certification I resources, you will minimize your Certification I cost and be ready to pass

your HP0-J29 test on Your First Try, 100% Money Back Guarantee included!

## **HP0-J29 Exam Study Guide**

HP0-J29 exam is regarded as one of the most favourite [Certification / Certifications](#). Many IT professionals prefer to add HP0-J29 exam among their credentials. Exam4Test not only caters you all the information regarding the HP0-J29 exam but also provides you the excellent HP0-J29 study guide which makes the certification exam easy for you.

### **Exam4Test Engine Features**

Comprehensive questions and answers about HP0-J29 exam

HP0-J29 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-J29 exam questions updated on regular basis

Same type as the certification exams, HP0-J29 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-J29 exam demo before you decide to buy it in Exam4Test.com

### **Exam4Test Help You Pass Any IT Exam**

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-J29

Title : Replication Solutions for the HP StorageWorks EVA

1. What is meant by the expression replication relationships = 3:1 in the HP StorageWorks Enterprise Virtual Array Compatibility Reference Guide? (Select two.)

- A. Using synchronous replication, a maximum of three hops between any two Enterprise Virtual Arrays is supported.
- B. One Enterprise Virtual Array may have replicated volumes on three other Enterprise Virtual Arrays.
- C. Three Enterprise Virtual Arrays may have replicated volumes on a fourth Enterprise Virtual Array.
- D. Using asynchronous replication, a maximum of three links between any two Enterprise Virtual Arrays is supported.
- E. One Enterprise Virtual Array may have a single volume replicated to three other Enterprise Virtual Arrays.

Answer: BC

2. You receive a call from a customer who informs you that their EVA4400 has initiated a full copy. What could have caused the full copy to start? (Select two.)

- A. The copy set changes exceeded 85%.
- B. The user-defined log size was reached and the DR group was marked for full copy.
- C. The log disk capacity exceeded the capacity of the largest Vdisk within the DR group.
- D. The log disk exceeded the half sum of the sizes of all members in the DR group.
- E. The log disk reached its maximum size of 2TB.

Answer: BE

3. When configuring EVAs in a six-fabric configuration, which ratio of host to replication fabrics should you have?

- A. 1:5
- B. 2:4
- C. 4:2
- D. 5:1

Answer: C

4. Your customer has two EVA6100 arrays, and their Continuous Access replication runs in synchronous mode. You remind the customer that when in synchronous mode, all DR group members are suspended simultaneously. What should the customer consider about I/O when suspending a DR group in this environment?

- A. All source host I/O is written to the write history log.
- B. All source host I/O to the DR group is re-routed to the target site.
- C. All source host I/O to this DR group is rejected and data is lost.
- D. All I/O is transferred to the destination site.

Answer: A

5. When building a six-fabric configuration using FC-to-IP, how many dedicated gateways are required?

- A. 2
- B. 8
- C. 4
- D. 12

Answer: C

6. Implementing N\_Port ID virtualization (NPIV) in a SAN provides certain advantages. Which statements are true about implementing such a solution? (Select two.)

- A. NPIV is required if there is 2:1 or greater server-to-uplink ratio on a fully populated enclosure with 16 server blades.
- B. You can only take advantage of NPIV when configured with HP Brocade SAN switches in C-Class blade enclosures.
- C. In large fabrics, NPIV helps to avoid exceeding domain count limits with multiple blade enclosures.
- D. NPIV makes a single Fibre Channel port appear as multiple virtual ports, each having its own N\_Port ID and virtual WWN.
- E. NPIV must be managed separately from the switches. However, it uses the common Fabric OS so that it can be consistently managed with the rest of the fabric.

Answer: CD

7. What determines the maximum number of snapshots per source that can be created at any time?

- A. controller firmware version
- B. total number of snapshots on other Vdisks
- C. Vraid level of the source Vdisk
- D. size of the source Vdisk

Answer: A

8. When implementing VMware Site Recovery Manager (SRM) in a Continuous Access EVA environment, what is required in addition to the SRM software?

- A. Replication Solution Manager host agent
- B. HP EVAx000 VDS1.0 and VDS1.1/VSS Hardware Providers
- C. HP StorageWorks EVA Virtualization Adapter
- D. HP EVA VDS/VSS 2.0 Hardware Providers

Answer: C

9. When designing EVA8100 and EVA4400 in a five-fabric 8-port to 4-port configuration, which ratio of host ports to replication ports is supported?

- A. 1:4
- B. 2:4
- C. 3:1
- D. 4:2

Answer: C

10. You are capturing workloads using the PERFMON tool for Windows. It reports performance data. To ensure the usefulness of the performance data you obtain from PERFMON and to include peak demand, for how long should you

collect data?

- A. 8 hours
- B. 48 hours
- C. 5 days
- D. 1 month

Answer: B

11. You are implementing HP StorageWorks Continuous Access EVA. What would you use to obtain a Recovery Point Objective (RPO) of zero in failsafe mode and a low performance impact?

- A. a latency less than or equal to 10ms in enhanced asynchronous replication mode
- B. a latency less than or equal to 120ms in asynchronous replication mode
- C. a 4Gb/s link with low latency in synchronous replication mode
- D. an 8Gb/s link with medium to high latency in synchronous replication mode

Answer: C

12. Your Continuous Access (CA) environment consists of bi-directional replication running in asynchronous mode. Which statements are true about this environment? (Select two.)

- A. A DR group cannot have a bi-directional relationship with other DR groups.
- B. Cascaded CA environments do not support bi-directional replication.
- C. Source and destination Vdisks can be stored on either array.
- D. Tasks such as data mining can be performed by destination site servers.
- E. Backup can only be performed on the destination site servers.

Answer: CD

13. Before designing a Business Copy and Continuous Access EVA solution for your customer, you should ensure that there are no interoperability issues. Which reference material should you consult to make this determination? (Select two.)

- A. HP Replication Solutions Manager Planning Guide
- B. HP StorageWorks Enterprise Virtual Array Compatibility Reference
- C. HP StorageWorks Continuous Access EVA Planning Matrix
- D. HP StorageWorks Continuous Access EVA QuickSpecs
- E. HP StorageWorks SAN Design Reference Guide

Answer: BE

14. You have an HP Continuous Access environment, and need to replicate the Replication Solutions Manager (RSM) configuration to the management server at the target site. How can you accomplish this? (Select two.)

- A. Use the CLUI command `export server` on the source server.
- B. Use the CLUI command `set server` on the target server.
- C. Use the replication manager's GUI option `Export RSM database to Remote RSM` on the target server.
- D. Use the replication manager's GUI option `Duplicate RSM database to Remote RSM` on the source server.
- E. On the target server, use the replication manager's GUI option `Import RSM database from Remote RSM`.

Answer: BE

15. What is a demand allocated snapshot also known as?

- A. replica snapshot
- B. dynamic snapshot
- C. instantaneous snapshot
- D. virtual snapshot

Answer: D
