

Exam4Test VCP-310 Exams

VMWare VMware Certified Professional on VI3

Practice Exam: VCP-310

Exam Number/Code: VCP-310

Exam Name: VMware Certified Professional on VI3

Questions and Answers: 203 Q&As

Exam Description

Order : [VCP-310 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the VCP-310 Exam.

Exam4Test **Practice Exams** for VCP-310 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **VMWare Certification** exam and get your *VMWare Certification Certification*.

We guarantee your success in the first attempt. If you do not pass the **VMWare Certification** "VCP-310" (VMware Certified Professional on VI3 on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test VMWare Certification VCP-310 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of VMWare Certification VCP-310 exam provides everything which you need to pass your exam. The VMWare Certification Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "VCP-310 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first VMWare Certified Professional on VI3(VMWare Certification) exam try, but also save your valuable time.

Comprehensive questions with complete details about VCP-310 exam.

VCP-310 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real VMWare Certification exam. VCP-310 exam questions updated on regular basis.

Like actual VMWare Certification Certification exams, VCP-310 exam preparation is in multiple-choice questions (MCQs). Tested by many real VMWare Certification exams before publishing.

Try free VMWare Certification exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the VCP-310 Exam: 100% Guarantee to Pass Your VCP-310 exam and get your VMWare Certification Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get your VMWare Certification Certification.

original topic. With our completed VMWare Certification resources, you will minimize your VMWare Certification cost and be ready to pass your VCP-310 test on Your First Try, 100% Money Back Guarantee included!

VCP-310 Exam Study Guide

VCP-310 exam is regarded as one of the most favourite [VMWare Certification Certifications](#). Many IT professionals prefer to add VCP-310 exam among their credentials. Exam4Test not only caters you all the information regarding the VCP-310 exam but also provides you the excellent VCP-310 study guide which makes the certification exam easy for you.

Exam4Test Engine Features

Comprehensive questions and answers about VCP-310 exam

VCP-310 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

VCP-310 exam questions updated on regular basis

Same type as the certification exams, VCP-310 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free VCP-310 exam demo before you decide to buy it in Exam4Test.com

Exam4Test Help You Pass Any IT Exam

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : VMWare VCP-310

Title : VMware Certified Professional on VI3

1. Which of the following is a benefit of ESX Server 3i over ESX Server?

A. Increased Security and Reliability

B. Memory Overcommitment

C. Improved Fault Isolation

D. Dynamic Resource Allocation

Answer: A

2. What is the advantage of installing backup client software in a Linux virtual machine's guest OS?

A. This configuration enables immediate booting from a restored virtual machine.

B. This configuration enables LAN-free backup.

C. This configuration enables ESX Server to do backup and restore operations.

D. This configuration enables individual files to be selected for backup or restore.

Answer: D

3. Which of the following are requirements for a VMware HA cluster? (Choose Two)

A. a private Ethernet network for all hosts

B. access to shared storage from all hosts

C. access to the virtual machine networks from all hosts

D. identical type and quantity of CPUs in each host

Answer: BC

4. How does ESX Server 3.x differ from VMware Server?

- A. ESX Server 3.x supports 64-bit guest operating systems and VMware Server 2.x does not.
- B. ESX Server 3.x supports VMware VirtualCenter and VMware Server 2.x does not.
- C. ESX Server 3.x supports Intel Virtualization Technology (VT) and VMware Server 2.x does not.
- D. ESX Server 3.x supports 4 processor Virtual SMP and VMware Server 2.x does not.

Answer: D

5. What are two characteristics of VMware Consolidated Backup? (Choose Two)

- A. LAN-free backups of virtual machines can be performed
- B. A plugin integrates the VCB UI into VirtualCenter
- C. Image-level backups of virtual machines can be performed
- D. File-level backups of Windows and Linux virtual machines can be performed

Answer: AC

6. What are two advantages of VCB over conventional agent-based methods of backing up a virtual machine's (VM's) data? (Choose Two)

- A. helps to eliminate the need for a backup window by using an online, snapshot-based backup
- B. makes it possible to do both file-based and full-system backup of the same VM simultaneously
- C. enables LAN-free backup and avoids undue overloading of the datacenter network
- D. allows selection of files and directories from the guest file system of any VM

Answer: AC

7. Which two conditions can cause a combined VMware DRS/HA cluster to change to a red status? (Choose Two)

- A. The current failover capacity is smaller than the configured capacity.
- B. All the primary hosts in the cluster are not responding.
- C. A DRS-only host has been added to an HA cluster.
- D. DRS is in the process of balancing resources among hosts in the cluster when an HA event occurs.

Answer: AB

8. How does ESX Server 3.5 differ from VMware Server 2?

- A. ESX Server 3.5 supports virtual machine clusters on the host server and VMware Server 2 does not.
- B. ESX Server 3.5 accesses SAN storage and VMware Server 2 does not.
- C. ESX Server 3.5 supports up to 128 GB of RAM and VMware Server 2 does not.
- D. ESX Server 3.5 deploys a virtual machine from a template and VMware Server 2 does not.

Answer: D

9. How does VMware Server 2 differ from ESX Server 3.5?

- A. VMware Server 2 supports legacy operating systems and ESX Server 3.5 does not.
- B. VMware Server 2 enhances software development and testing and ESX Server 3.5 does not.
- C. VMware Server 2 runs on a Linux host and ESX Server 3.5 does not.
- D. VMware Server 2 supports up to 128 GB of RAM and ESX Server 3.5 does not.

Answer: C

10. Which of the following situations will result in VMware HA restarting virtual machines? (Choose Two)

- A. An ESX Server in the cluster becomes isolated from the network.
- B. A guest OS is manually powered off.
- C. A guest OS fails.
- D. An ESX Server in the cluster is put into Maintenance mode.

Answer: AC

11. In configuring a VMware HA Cluster the System Administrator can configure Admission Control. There are two options: Do not power on Virtual Machines if they violate availability constraints, or Allow Virtual Machines to be powered on even if they violate availability constraints. If the System Administrator chooses the option "Do not power on Virtual Machines if they violate availability constraints" then which of the following apply? (Choose Two)

- A. VMware HA enforces the failover capacity defined for the cluster.

- B. Only Virtual Machines with a high restart priority will be restarted on surviving ESX hosts.
- C. VMware HA restarts VM's on surviving host with the most unreserved capacity.
- D. Virtual Machines running on failed ESX hosts will not be restarted on surviving ESX hosts.

Answer: AC

12. Which of the following conditions can prevent a virtual machine (VM) that is part of a VMware HA cluster from being powered on? (Choose Two)

- A. Guaranteed admission control cannot allocate sufficient CPU reservation for the VM.
- B. The VM has been configured with a virtual disk on local storage.
- C. Strict admission control is configured and insufficient resources are available for the VM.
- D. There is a mismatch in CPU capabilities between one or more HA cluster nodes.

Answer: BC

13. Which statement is true about VCB proxy?

- A. It must be set to assign Windows drive letters to prevent data corruption.
- B. It must be set to prevent assignment of Windows drive letters to prevent data corruption.
- C. When running under Linux, it has no concept of Windows drive letter mappings.
- D. It assigns Windows drive letters to Raw Device Mapped LUNs that are assigned to Windows virtual machines.

Answer: B

14. Which of the following files are part of a typical virtual machine?

- A. Virtual Disk File (.vmdk)
- B. Configuration File (.vmx)
- C. VMotion Transfer File (.vmt)
- D. Hardware File (.svr)
- E. BIOS File (.nvram)

Answer: ABE

15. What are two reasons why a company would choose to use ESX Server 3.x instead of using VMware Server 2? (Choose Two)

- A. The company needs the ability to run dual-processor virtual machines.
- B. VMware Server 2 does not support running virtual machines in a production environment.
- C. The company wants the ability to use VMotion.
- D. ESX Server 3.x offers better resource management and better performance.

Answer: CD

16. Which of the following are required for installing VMware Consolidated Backup? (Choose Two)

- A. the server must be a physical machine
- B. the operating system must be Windows
- C. the server can be a physical or a virtual machine
- D. the operating system can be Windows or Linux

Answer: BC

17. An ESX Administrator is configuring a VMware High Availability Cluster for three hosts and their resident VMs. The HA cluster will be configured to support a single host failure and resource considerations must be enforced during a failover event. To accomplish this task:

- A. Each host in the cluster must be able to accommodate the VM with the highest CPU limit value
- B. There must be enough cluster resources based on memory and CPU reservations to account for any potential host failure
- C. Each host in the cluster must be able to accommodate the VM with the largest configured available memory
- D. All potential remaining hosts during a failure event must be able to accommodate the sum total of all VMs' available memory configurations

Answer: B

18. A company decides to explore virtualization options for one of their departments. Their environment and requirements are:

- (1) The users should be able to create their own virtual machines
- (2) The users are running Windows XP on their desktops.
- (3) Several virtual machines will be set up for each user and they should be able to run them all at the same time.
- (4) The users will use the software to edit memory settings after the virtual machine is installed.
- (5) Virtual machine performance and high availability are more important than keeping costs low.
- (6) These machines WILL be run in production and WILL be used or managed remotely.

What is the correct solution based on these criteria?

- A. give the users VMware VirtualCenter Client 2.x and grant them permission to create virtual machines on an ESX Server 3.x, with access to all necessary operating system ISOs
- B. give the users VMware Workstation 6.x and all necessary operating system CDs or ISOs
- C. give the users VMware Server 2.x and all necessary operating system CDs or ISOs
- D. give the users VMware Player 2.x and all necessary operating system CDs or ISOs

Answer: A

19. For a cluster with two ESX hosts, one using Intel processors and other using AMD processors, which of the following statements is true? (Choose Two)

- A. VMotion can move live VMs from one host to another
- B. VMware DRS can load balance live VMs among hosts
- C. Storage VMotion can move a virtual machine disk file from one storage device to another
- D. VMware HA can failover VMS from one host to another in case of a host failure

Answer: CD

20. Which of the following products are part of the VMware Infrastructure 3 software suite?

- A. VMware Virtual Desktop Manager
- B. VMware Distributed Resource Scheduler
- C. VMware Update Manager
- D. VMware Site Recovery Manager

Answer: BC
