### ***EMC Backup & Recovery Specialist Exam for Storage Administrators***

**Practice Exam:** e20-597

**Exam Number/Code:** e20-597

**Exam Name:** Backup & Recovery Specialist Exam for Storage Administrators

**Questions and Answers:** 260 Q&As

#### **Exam Description**

**Order :** [e20-597 Exam](#)

1. Exam4Test offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the e20-597 Exam.

Exam4Test **Practice Exams** for e20-597 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **Technology Foundations** exam and get your *Technology Foundations Certification*.

We guarantee your success in the first attempt. If you do not pass the **Technology Foundations** "e20-597" (Backup & Recovery Specialist Exam for Storage Administrators on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Exam4Test Technology Foundations e20-597 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of Technology Foundations e20-597 exam provides everything which you need to pass your exam. The Technology Foundations Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "e20-597 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Backup & Recovery Specialist Exam for Storage Administrators( Technology Foundations ) exam try, but also save your valuable time.

Comprehensive questions with complete details about e20-597 exam.

e20-597 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real Technology Foundations exam. e20-597 exam questions updated on regular basis.

Like actual Technology Foundations Certification exams, e20-597 exam preparation is in multiple-choice questions (MCQs). Tested by many real Technology Foundations exams before publishing.

Try free Technology Foundations exam demo before you decide to buy it in <http://www.Exam4Test.com>

High quality and Valued for the e20-597 Exam: 100% Guarantee to Pass Your e20-597 exam and get your Technology Foundations Certification. Come to <http://www.Exam4Test.com> The easiest and quickest way to get you Technology Foundations Certification.

Exam4Test professional provides Technology Foundations e20-597 the newest Q&A, completely covers e20-597 test original topic. With our completed Technology Foundations resources, you will minimize your Technology Foundations cost and be ready to pass your e20-597 test on Your First Try, 100% Money Back Guarantee included!

## **e20-597 Exam Study Guide**

e20-597 exam is regarded as one of the most favourite [Technology Foundations Certifications](#). Many IT professionals prefer to add e20-597 exam among their credentials. Exam4Test not only caters you all the information regarding the e20-597 exam but also provides you the excellent e20-597 study guide which makes the certification exam easy for you.

## **Exam4Test Engine Features**

Comprehensive questions and answers about e20-597 exam

e20-597 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

e20-597 exam questions updated on regular basis

Same type as the certification exams, e20-597 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

## **Exam4Test Help You Pass Any IT Exam**

[Exam4Test.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-597

Title : Backup & Recovery Specialist Exam for Storage  
Administrators Certification

1. You are designing a solution for a customer using NetWorker and PowerSnap, to create and back up copy on write (CoW) snapshots of a STD device on a DMX-3 accessed from a Solaris 9 application host. The STD volume size is 300 GB with a change rate of 10%.

What is the minimum VDEV (Virtual Device) size needed?

- A. 30 GB
- B. 270 GB
- C. 300 GB
- D. 330 GB

Answer: C

2. A CLARiiON CX3-20 with 4 GB of system cache has been configured as a backup-to-disk device.

What is the minimum recommended read cache size?

- A. 1 GB
- B. 2 GB
- C. 200 MB
- D. 500 MB

Answer: C

3. Your customer is planning a NetWorker backup environment. They will have one NetWorker server and two storage nodes, all sharing the four tape drives in one autochanger.

How many dynamic drive sharing licenses are needed?

- A. 1
- B. 3
- C. 4
- D. 12

Answer: C

4. Which NetWorker edition is needed to configure a data zone with a NetWorker server with 16 LTO2 devices and 10 storage nodes with 32 devices each?

- A. Business
- B. Network
- C. Power
- D. Workgroup

Answer: C

5. What is an advantage of using EMC OnCourse?

- A. Automated file transfers across Celerra systems
- B. Creates local, point-in-time logical disk copies
- C. Provides a "near instant" snapshot of a filesystem on the same or different Celerras
- D. Automated file transfers across existing servers

Answer: C

6. A customer decides to implement a two-tier backup solution, with disk as tier one and tape as tier two. A retention period needs to be defined for tier one, which would determine when the data will be moved to tier two.

What determines this retention period?

- A. Backup window
- B. Data type in the environment
- C. Recovery point objective (RPO)
- D. Recovery time objective (RTO)

Answer: D

7. A customer buys an NS80 with two trays of 500 GB ATA disks to be used as the primary backup destination device. According to best practices, how is the second tray configured?

- A. One 8+1 RAID 3 group, one 4+1 RAID 3 group, and one hot spare
- B. Three 4+1 RAID 3 groups
- C. Three 4+1 RAID 5 groups
- D. Two 6+1 RAID 5 groups and one hot spare

Answer: D

8. A defined backup policy takes full backups every Monday and incremental backups on the remaining weekdays. In the worst case how many restores would you have to perform to recover a file that was removed by mistake on Friday morning?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: D

9. Your customer is planning a NetWorker backup environment. They have one NetWorker server and two storage nodes, all using the same autochanger for backups. The autochanger has two tape drives.

What is the MINIMUM number of dynamic drive sharing licenses needed?

- A. 1
- B. 2
- C. 3

D. 4

Answer: A

10. Your customer is using an advanced file type device and would like to perform save set cloning after backup. Which option is available for this configuration?

- A. Automatic and manual cloning of a save set, but cloning can begin only after all the save sets in the savegroup have been backed up
- B. Automatic cloning after all the save sets in the savegroup have been backed up and manual cloning of a save set as soon as it has finished its backup
- C. Manual cloning of a save set, but cloning can begin only after all the save sets in the savegroup have been backed up
- D. Save set cloning is not supported for advanced file type devices

Answer: B

11. Which NetWorker command can be used to find out the dates that a specific save set has been backed up?

- A. mminfo
- B. mmls
- C. nsrinfo
- D. nsrls

Answer: A

12. In NetWorker 7.4, what could be done to add a client to a group?

- A. Drag the client onto the group resource
- B. Drag the client onto the pool resource
- C. Select the client in the group resource
- D. Select the client in the pool resource

Answer: A

13. For which type of NetWorker backup is the client file index backed up?

- A. Client-initiated and server-initiated
- B. Client-initiated only
- C. Raw backups
- D. Server-initiated only

Answer: D

14. You want to deploy a NetWorker backup solution in an environment consisting of five Linux servers, two HP-UX, four Solaris, four Windows 2000 and three Windows 2003.

One of the Solaris servers is currently idle so you decide to use it as the NetWorker server. The customer purchased a NetWorker Power Edition for UNIX.

How many additional licenses are needed?

- A. Seven client connections and three ClientPaks
- B. Seven client connections and five ClientPaks
- C. Eight client connections and two ClientPaks
- D. Eight client connections and three ClientPaks

Answer: D

15. A telco company needs to retain log files for 1 year for legal compliance. RTO for files backed up within the last week is in minutes.

Which backup solution should be recommended?

- A. Advanced file type device
- B. EMC Centera
- C. NDMP device
- D. Tape library

Answer: A

16. What is a characteristic of an advanced file type device in NetWorker?

- A. Can only clone to another advanced file type device
- B. Duplicate media database records
- C. Requires a separate pool
- D. Save sets are stored in separate files in a flat directory format

Answer: B

17. A customer has two tape drives configured to a NetWorker storage node that is currently backing up four clients. How many nsrmmdbd processes are running on the storage node?

- A. 0
- B. 1
- C. 2
- D. 4

Answer: A

18. Click the Exhibit button.

You are backing up your data every day at midnight as shown in the exhibit. You have a failure on day 5 at 11 A.M. How many backups must be recovered?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

19. Why are split-mirror snapshots preferred for disaster recovery?

- A. Always consistent
- B. Faster recovery compared to copy on write snapshots
- C. Provides a complete copy of production data
- D. Requires less storage space compared to copy on write snapshots

Answer: C

20. A company wants to move to a backup-to-disk solution, and is considering Celerra. What is an advantage of this solution?

- A. Built-in tape acceleration algorithm
- B. Extra hardware not required on the storage node
- C. File system shares dedicated to individual storage nodes
- D. Fragments file system to improve writes

Answer: B
